

Populate the fields with the following parameters. Any params that are not mentioned are not required for the app to work.

Make sure to replace the values in {{curly brackets}} with your company information. And make sure you use the same naming as it appears below.

Field	Value
Label	Edit Appointment
Name	Edit_Appointment
Description	Edit an appointment via BookingBug
Display type	Detail Page Button
Behaviour	Display in new window (recommended)
Content source	URL
Input box	<code>https://customer.bookingbug.com/?client={{client-project}}&environment={{env}}&purchase={!Event.booking__LongId__c}#/amend/view</code>

Extra info on Input Box:

- `{! . }` stands for ! the object where you getting the data from & . the name of the field
- This data is pulled from the object and added to the customer journey URL
