# Which Walmart tool should I use for Fashion item management?

Over the next few months, Fashion functionality will be removed from Walmart's legacy tools as **Supplier One** becomes your day-to-day item management tool. Category Advisors and Suppliers who also sell in Canada should continue using **Item 360**.

Note: If you use a data pool provider to publish synced item info with GDSN (which is recommended but not required), make sure the data is pushed to Walmart before starting your Fashion item setup or maintenance in Item 360 or Supplier One.

Fashion Setup

	Follow existing process	Item 360	Supplier One
Set up new domestic Fashion item configurations sold in U.S. stores and on Walmart.com (except item configurations in Supplier Quote)		✓	
Set up new AK, HI, PR items in Fashion	✓

Fashion Inquiry

	Follow existing process	Item 360	Supplier One
View Fashion item history		✓	
View details about Fashion items, shippers, or assortments		✓	
View DSV Payment History reports			✓
View DSV Scorecard			✓

What does coming soon mean?
This functionality will still be available via existing tools / processes for the next few months; however, it will be removed and only available in Item 360 or Supplier One in the near future. Functionality that is not listed as *Coming Soon* is currently not planned to be added to Item 360 or Supplier One.

Where should I upload and maintain imagery?
If you currently use Workhorse to upload and maintain imagery, please follow your existing process. For Fashion categories, the Main Image URL is not required at the time of setup in Item 360 or Supplier One (i.e., please do not submit a placeholder image URL).
