Customer & Vendor Improvements

- ✓ Customer In-stock Improvements
- ✓ Vendor Shipment Aggregation
- ✓ FC Order Minimum Sharing
- ✓ Expanded FC Placement Opportunities

Item Eligibility Determined at the Item Configuration Level (Walmart Item Number)

*Example Config Only
Not all Products will have dual configs*

! Ecomm only items are determined at Walmart Item number (configuration). Shared UPC items are eligible.

NDC 6069 Location Setup May be Needed

Setup National Distribution Center location with:

- Dun and Bradstreet Number (DUNS: 0519577696691)
- Global Location Number (GLN: 0078742033587)

Please note most suppliers will see PO will cut to the GLN above but not all will.

Please map the GLN and DUNs the NDC 6069 POs show.

NDC PO Event Code and Type

NDC POs will have a special event code:

- NDC will be on their own PO with the **ONLINEREPL event code**
- Replenishable items will be on a **type 33 PO**
- *PO with **DC #6069** with distribution to FC store numbers*

 Please note if you ship to an ACC consolidation location the event code may not be ONLINEREPL and the DC number won't be 6069.

NDC Replenishable Items will Receive Type 33 POs to NDC (6069) with distribution to FC Store IDs

DC ID: 7552

Store ID: 2802

National Node POs

- PO Type 33
- Distribution with Store ID

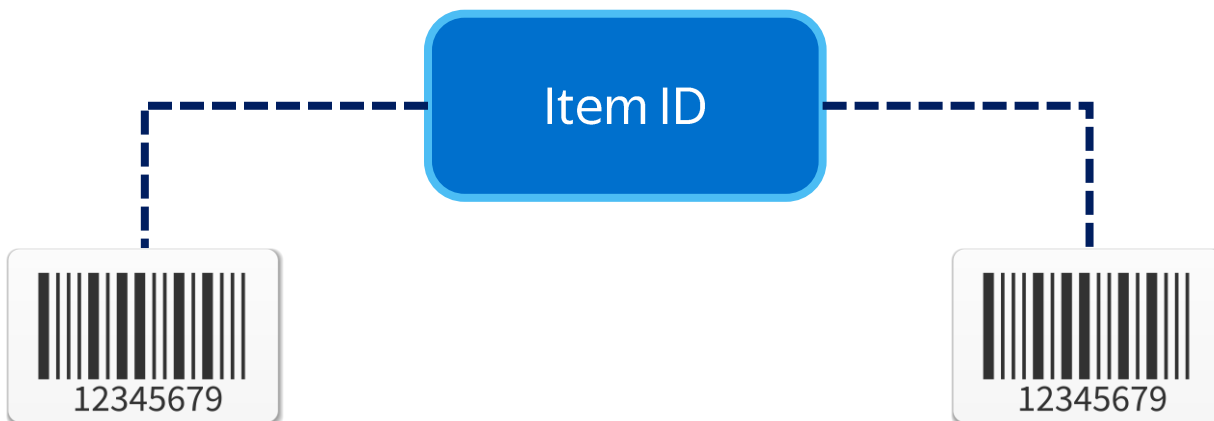

FC DC and Store Number Match

FC	FC TYPE	FC Store ID	DC ID	City	State

Note: If you ship to an ACC, your POs will still go to those locations first.

New Walmart Item Number (WIN)

Old WIN

Config: 12/12

- 12 Vendor PK
 - 12 Warehouse PK
- Case Pack Indicator: C

New WIN

Config: 12/1

- 12 Vendor PK
 - **1** Warehouse PK
- Case Pack Indicator: **B**

If you have ecomm only item configs **not break pack** Today but are packaged at the eaches or with an inner pack,
please create new items with the correct configuration.

Check List

- 1 Ensure new WIN is mapped in your EDI
- 2 Create current case pack items as break pack if eligible
- 3 Work with RM to update SI Primary WIN to new break pack item

Item Creation Requirements for National Node

New item numbers must be set up packed x/1 for Sellable GTINs/UPCs:

- Marked “No” when asked “Will these items (configurations) be sold in stores?”.
- Items should be set up as “Is Breakpack” = Y.
- FC “Store” Numbers must be set up on the supplier end internally.

Have your Merchant set those WINs as **primary orderable** to the FC – if eCom Replen flag is on, these items will begin shipping as National Node items.

Key Takeaways

1. Walmart item numbers with **ecomm** configurations are in scope for **NDC** and **breakpack** changes.
2. Setup **ecomm** configurations as **breakpack** if eligible and **work with RM** to update SI primary.
3. Look for POs with **ONLINEREPL** or **ONLINE ASAP** to **6069** with distributions to FC store numbers.

Thank you!

Item Assortment Expansion Initiative

How are items Identified?

Selected based on **strong demand** signals, such as being rated as **best sellers** and showing **high demand** across both internal data and external market trends.

What is changing for the items?

Creates a 1P offer where we have existing 1P supplier relationships. This allows items to be **transactable** and **replenishable** through Walmart.com.

Ship POs to help us meet customer demand

What should I do if an item is **discontinued** or **not available**?

- Cancel those items in Nova using **“End of Life Items/Seasonal”**.
- **Merchant discussion** may be initiated, if warranted.
