Over the next few months, functionality will be removed from Walmart's legacy tools as **Item 360** and **Supplier One** become your day-to-day item management tools.

Note: If you use a data pool provider to publish synced item info with GDSN (which is recommended but not required), make sure the data is pushed to Walmart before starting your item setup or maintenance in Item 360 or Supplier One.

View DSV Scorecard			✓

WHAT DOES COMING SOON MEAN?

This functionality will still be available via existing tools / processes for the next few months; however, it will be removed and only available in Item 360 or Supplier One in the near future. Functionality that is not listed as Coming Soon is currently not planned to be added to Item 360 or Supplier One.
