

Which Walmart tool should I use for Apparel item management?

Over the next few months, Apparel functionality will be removed from Walmart’s legacy tools as **Item 360** and **Supplier One** become your day-to-day item management tools.

Note: If you use a data pool provider to publish synced item info with GDSN (which is recommended but not required), make sure the data is pushed to Walmart before starting your Apparel item setup or maintenance in Item 360 or Supplier One.

APPAREL SETUP

Set up new domestic Apparel item configurations sold in U.S. stores and on Walmart.com (except item configurations in Supplier Quote)			✓
Set up new AK, HI, PR items in Apparel	✓		
Set up Supplier Quote Apparel items and shippers (prime and content items)	✓		Coming soon!
Set up new domestic Apparel shippers (prime and content items)			✓
Set up new domestic Apparel assortment parent item	✓		
Set up domestic Apparel assortment child items			✓
Confirm initial loads / choose items from a GS1 publication (GDSN-synced items)			✓
Utilize new domestic Apparel item spec by Product Type (except item configurations in Supplier Quote)			✓

APPAREL MAINTENANCE

Maintain DSV facility info and contact information			✓
Manage DSV Purchase Orders			✓
Manage DSV Inventory			✓
Maintain supply chain info (ex: Factory ID)			✓
Maintain product content (ex: Product Name, Brand Name)			✓
Maintain AK, HI, PR items in Apparel			✓
Maintain existing Direct Import Apparel items			✓

APPAREL INQUIRY

View Apparel item history			✓
View details about Apparel items, shippers, or assortments			✓
View DSV Payment History reports			✓
View DSV Scorecard			✓

WHAT DOES COMING SOON MEAN?

This functionality will still be available via existing tools / processes for the next few months; however, it will be removed and only available in Item 360 or Supplier One in the near future. Functionality that is not listed as *Coming Soon* is currently not planned to be added to Item 360 or Supplier One.

WHERE SHOULD I UPLOAD AND MAINTAIN IMAGERY?

If you currently use Workhorse to upload and maintain imagery, please follow your existing process. For Apparel categories, the Main Image URL is not required at the time of setup in Item 360 or Supplier One (i.e., please do not submit a placeholder image URL).
