INTRODUCTION

This document describes the enhancements and fixes made in version 1.5.3 of Business Cloud Essentials. This version adds the following enhancements and fixes to the software:

ENHANCEMENTS

ADDING EXPIRY DATE IN STOCK ADJUSTMENT

When creating stock adjustments an 'Expiry' date can be selected or imported for new serial numbers. Previously the option to select 'Expiry' date was not available when users created new serial numbers. Expiry dates for existing serial numbers can be viewed as read only.

Stock Adjustments

General

Adjustment Type (required)

stock count
 stock gain
 stock loss

Stock Location (required)

Warehouse 1.2

Tip: if you choose stock gain or stock loss you can use a - symbol to adjust in the opposite direction.

Items

Stock / Order Item	System Qty	Qty	Difference	Narrative	Reference
GRASS MACHINE	5	15	+10		

▼ **Serial numbers** 0 serial numbers; 15.00 qty without serial number;

Qty	15.00	S/N	SN/GM/12112029	Supplier	Expiry
			Serial Number Enquiry		31/05/2029

ACTIVATING OBSOLETE STOCK LOCATION

Obsolete locations can be reactivated before being used for creating new documents. Previously the option to reactivate locations was no longer available once the location had been obsolete.

<input type="checkbox"/> Stock Location One	Y	

Users can choose to 'Activate' an obsoleted location from 'Actions'.

ADDING FORECAST IN STOCK ENQUIRY

A new 'Forecast' column is introduced to the 'Stock Enquiry' popup window, providing more information to assist users and to help plan supplies effectively.

An explanation of the 'Free Stock' and 'Forecast' calculations is illustrated within the title bar.

PURCHASE ORDER DELIVERY ADDRESS

The 'Receiving Company' and 'Telephone' fields are populated from the information held in company settings. Previously, both these fields displayed blank values regardless of whether the details were stored in company settings.

Delivery Address ?

Address Line 1 for Company,
Postcode for Company

Alternate Company Line 1, Alternate
Company 360005

Contact Name ?

Telephone ?

Receiving Company ?

STRIP WHITE-SPACE FROM THE 'VAT REGISTRATION NUMBER'

A modification has been made to automatically remove any spaces from the VAT registration number to prevent error responses from the HMRC on submission of VAT return.

KIT ITEMS RECORDS CORRECTION IN UNDISPATCHED ITEM REPORT

The components of Kit items can now be viewed from the item name for Sales Orders when the report is 'Grouped by stock'. In addition, an informative text popup indicates if the part is a component of a kit item.

Previously, when grouping un-dispatched items report by stock, components were shown under kit making it difficult for the user to identify the exact stock not dispatched for the Sales Order.

FREE STOCK REPORT- SORTING

Sorting can now be applied to the 'Stock Item' and 'Stock Code' columns on the 'Free Stock report'.

Free Stock Report ?

Remove items committed to Sales Orders?
 Remove Components committed to Works Orders?
 Add scheduled Works Order Production items?
 Add items scheduled for Purchase Order?
 Hide all rows where quantities are zero?

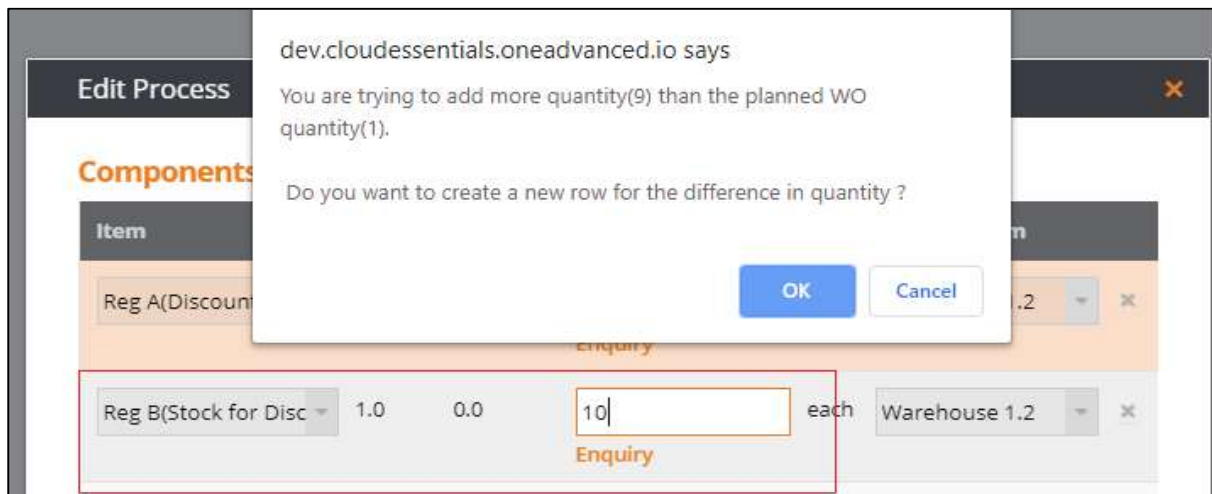

GENERATE REPORT
EXPORT REPORT
BACK

Stock Item	Stock Code	UoM	Physical Quantity	Net Quantity
WASHER	STK001	each	91.0	91.00
GASKET	STK002	each	-7.0	-7.00
PLUG	STK003	each	125.0	125.00

LIVE PROCESS VIEW- AUTOMATIC ADDITION OF ROW

Where there is over usage for items from the Live Process View, users now have an option to add new rows that will automatically calculate the difference in quantity.

Previously, if users reported over usage, they had to add a new line item manually and work out the difference between the actual quantity used and the quantity on the Works Order to enter on a new line item. These additional steps are no longer required.

FIXES

JIRA ID	TITLE	RESOLUTION
HBCE-1705	Improved the time taken to send emails.	Fixed
