

Link FBA Inbound Shipment to PO

This topic describes how to link an FBA inbound shipment to a purchase order in SellerCloud's **original Alpha version**. For the **Delta version**, see [Syncing an FBA Inbound Shipment to a PO](https://help.sellercloud.com/article/hyitqgs11v-syncing-an-fba-inbound-shipment-to-a-po) (<https://help.sellercloud.com/article/hyitqgs11v-syncing-an-fba-inbound-shipment-to-a-po>).

A convenient way to order quantity for FBA is to create a PO from the FBA Shipment after creating an FBA inbound shipment:

- 1 On the FBA Inbound Shipment, click Action Menu > **Generate/Sync PO > Go**.
- 2 Complete the fields and click **Create Purchase Order**.

Home > Search > Manage Inventory > FBA Inbound Shipment > Shipment #2845 > Create PO for Shipment

Shipment #2845

Description: 12-19-2019 04-18-PM Created On: 12/19/2019 04:18 PM
Ship From: SellerCloud Modified On: 12/19/2019 04:18 PM

Unlike creating an FBA shipment from a PO, creating a PO from an FBA Shipment will not direct the vendor to ship items to the Amazon Fulfillment center. The Ship To address does not change to the Amazon Fulfillment center on the FBA Inbound shipment.
