

# Change a SKU

The Product ID code of a SKU can be renamed to a new Product ID.

SKUs can only be renamed if there is no order, inventory, purchasing, or listing history on the item.

If you are changing the SKU to match the product code on a channel, consider keeping the current SKU and using the Merchant SKU field on each channels' product properties page instead, in order to link the SKU with the channel.

## Renaming a SKU

To enable this feature, use the client setting **Hide options to merge or change product SKU**

- 1 Select the product from the Manage Inventory Page.
- 2 From the Action Menu > **Change Product SKU > Go.**
- 3 Enter the new SKU > **Change SKU.**
