## Revision History

Version	Description	Date	By
1.0	On Release	20/12/2021	AD

## DRS 6.0.0.6 Summary

Release 6.0.0.6 includes a number of important changes since 6.0.0.4.

**NOTE:** 6.0.0.5 was a hotfix release and all issues have been rolled up into this release.

## Purpose of this Document

This document is a detail of the functional changes made to DRS 6 since Release 6.0.0.4. It is intended for use by Advanced staff and our Version 6 Customers who require this detailed level of information when they are upgrading to 6.0.0.6.

## Summary

This document describes the functional changes made to DRS since Release 6.0.0.4.

## DRS User Interface

The following changes have been made to the User Interface for DRS 6.

### All from Today Time Filter not including New Jobs in the future (DRS-5250)

New Jobs were being excluded from the 'all from today' time filter view. This has now been resolved.

### Periodical Job Split Mode not available (DRS-4379)

A new screen has been added to support the Recurring Job Feature. The following is a general explanation of its use:

Open an order (view mode)

Scroll down to see the recurrent job templates list

Select a recurrent job (create a new one if you have no one in the list) and click on SPLIT

The new screen is displayed.

Additional Notes:

- The end date you enter has to be included in the current validity period.
- Once you validated the split date, you will be redirected to the job screen directly
- Job screen has been improved when the job edited or added is a recurrent one :
  - The title of the screen is now on recurrent job (instead of job)
  - The validity time period is improved with new controls

### No configurable Meetings View (DRS-5149)

A new option has been included in the View Configuration to allow for configurable view screens for the Meeting options.

The Job Template ID and Name is not being used consistently (DRS-5224)

The reference to ID and Name have been better aligned throughout the product.

No scroll bar assigned to Button configuration on profiles (DRS-5276) A scroll bar has been added to the Button Mapping options within the User Profile to allow for better use of the option.

### Worker Filter is not working correctly. (DRS-5328)

The sector filter was not refreshing correctly after it was removed or changed. This has been improved.

### The Violation icon should not be displayed if the Job is Suspended (DRS-5374)

Job Violation is now removed on jobs which are suspended from planning.

### Ability to hide some Main Objects is missing (DRS-5375)

Additional options were added to allow users to hide Top Level objects, (customer, object, job, worker) on the user profile.

### Add and Copy Meeting Buttons are not available (DRS-5441)

It was found that the Meetings features were linked in the security layer to the permissions for Orders. This has been disconnected and access and visibility is now allocated individually.

### When changing password, If initial password is wrong, label is not translated correctly (DRS-5325)

A bad error response has been improved on a failed password attempt.

## DRS User Actions

The following changes have been made to the User Actions within DRS 6.

### An already existing View can't be updated and saved (DRS-5311)

An error was found when trying to edit and save an already shared view. This prevented changes being applied. This has now been resolved.

### Error on editing and saving a job (DRS-5386)

An error was found where Numeric Attributes were being cast as Non-Numeric types on edit and save. This has been investigated and resolved.

### Job Duration is incorrect for Two Man Templates (DRS-5388)

Paired Jobs were being scheduled correctly but displaying over a 24-hour period on diaries. This has been resolved.

### Deleting an Ability in Worker Template fails (DRS-5212)

There was an issue where abilities could not be removed from Worker Templates if they were not in use on any templates. This has now been resolved.

### Export menu opens when clicking on blank space after keep option (DRS-5216)

The hot zone for the Export Selection has been limited to the selection of the option itself.

### A '\*' is automatically added at the end of the filters but adds multiples if one already exists (DRS-5385)

If a customer used a \* on a Boolean search, an additional \* was added after the search. This will no longer happen.

## DRS Application Layer

The following changes have been made to the DRS Application, Server, or Database.

### Numeric Multi-Select Abilities shows incorrect comparison values (DRS-5230)

The way NUMBER Abilities are analysed has been improved where they are set to be multi-select.

### Export file name incorrect (DRS-5344)

Export files are now more consistently exported with the correct extension.

## Release 6.0.0.6 List of Components

Function	Version
DRS Server (Kernel)	6.3R1.9
Background Service	6.0.0.6
Connector Services	6.0.0.6
Inbound Connector	6.0.0.6
Mobile Gateway	6.0.0.6
Project Planner	6.0.0.6
Utility Service	6.0.0.6
DRS Web Services Gateway	6.0.0.6
Archive/Housekeeping	6.0.0.6
UK Geocoding Postcode Database	02/2021

## External Component Versions

Description	Version
Tomcat	9.0.52.0
Tomcat Native	1.2.30.0
Java	Corretto 8.302.08.1
MariaDB	10.3.31.0
php	7.3.3.0
Apache	2.4.48.0
.Net	4.7
SoapUI	5.5.0
