

**HUBT BROKER**  
AUTOMATIC, SECURE DATA TRANSFORMATION

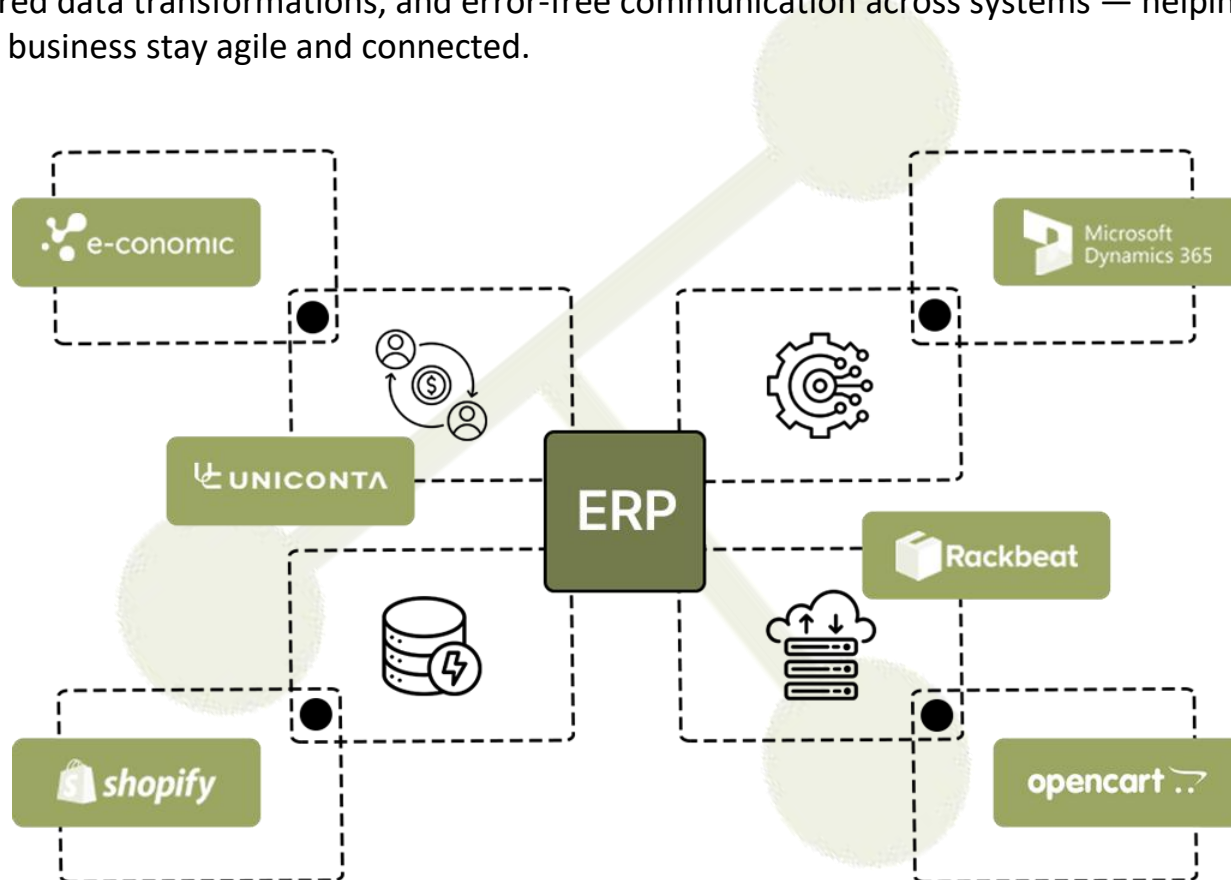

# ERP INTEGRATION

# Product Description

**Quick Summary** - Seamlessly integrate and centralize your ERP system with external partners and platforms.

**What it does?** - HubBroker's ERP integration service enables smooth and secure data exchange between your ERP system and third-party platforms such as suppliers, webshops, logistics providers, and marketplaces. Our solution ensures real-time synchronization, tailored data transformations, and error-free communication across systems — helping your business stay agile and connected.

## Key Features

- Seamless integration with leading ERPs like Microsoft Dynamics, SAP, Visma, Unicontra, and more
- Real-time data exchange and synchronization
- Customized data mapping and transformation logic
- Scalable, cloud-based, and secure infrastructure
- Built-in monitoring, logging, and error-handling capabilities

# Benefits for Your Business

- Boosts data accuracy and consistency across systems
- Simplifies complex integrations with trading partners
- Enhances operational efficiency and collaboration
- Reduces manual intervention and integration costs
- Supports faster decision-making and business scalability
