

HUBBROKER
AUTOMATIC, SECURE DATA TRANSFORMATION

Integration Platform as a Service (iPaaS)

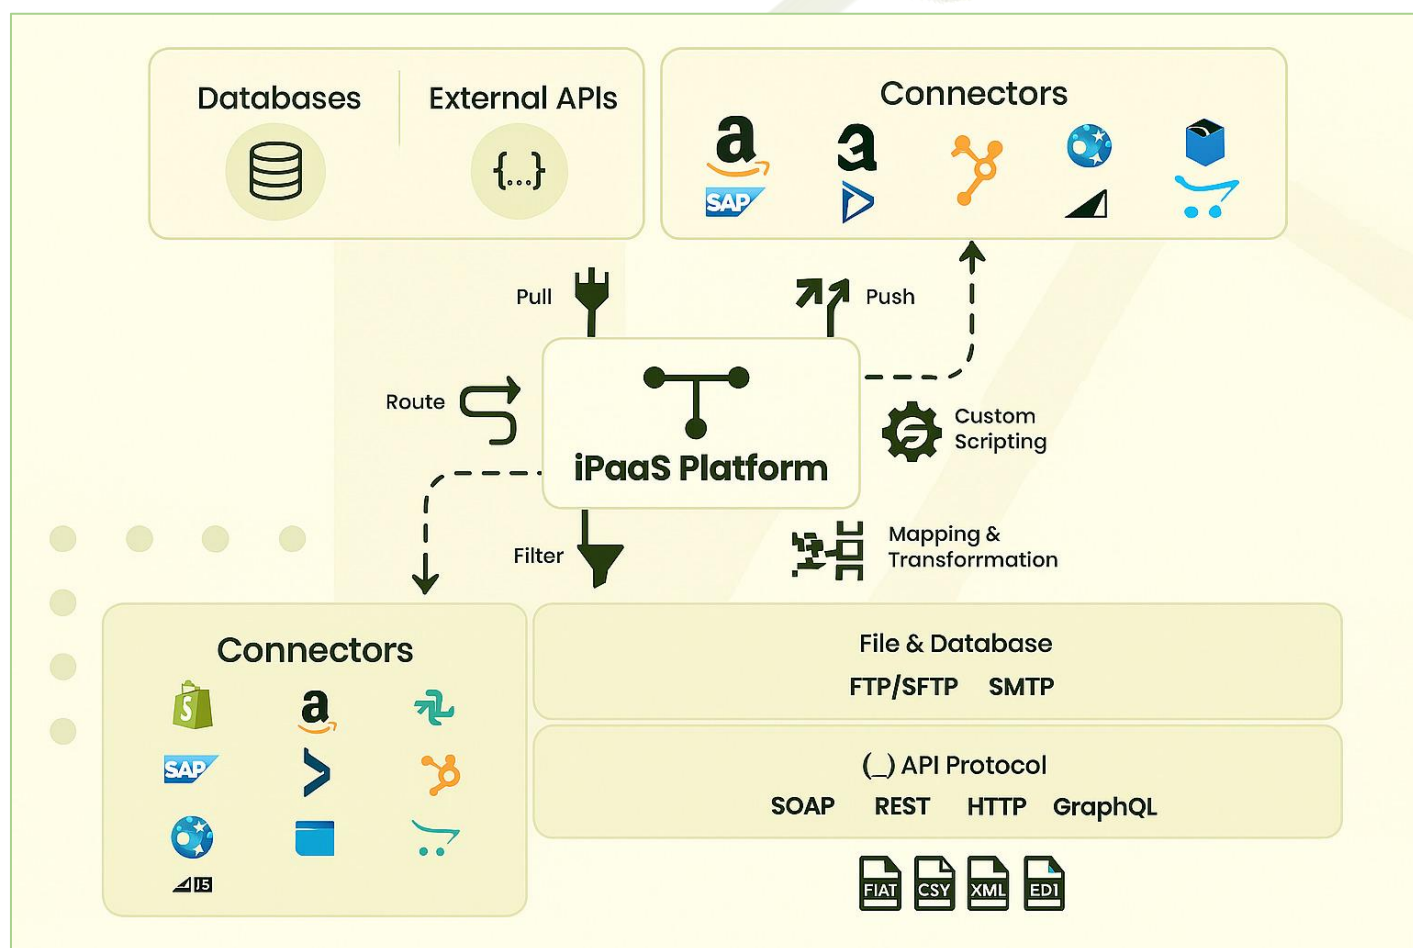

Product Description

Quick Summary - Connect and **automate your systems to simplify business processes** and improve efficiency.

What it does? - HubBroker's **iPaaS solution** helps businesses seamlessly connect different systems-like **ERP, CRM, eCommerce platforms**, and logistics tools-so data can move automatically between them.

It provides an easy-to-manage, cloud-based platform that supports full automation of your workflows, while giving you **visibility, control, and flexibility** in how data is transformed and exchanged.

Key Features

- Cloud-based integration platform - No on-premise setup required
- Ready-to-use connectors for ERP, CRM, eCommerce, logistics, and more
- Custom workflow automation and data transformation rules
- Real-time monitoring, notifications, and error tracking
- Secure and scalable infrastructure for growing businesses

Benefits for Your Business

- Improves operational efficiency
- Reduces integration costs
- Accelerates digital transformation
- Enhances data visibility across the organization.
