

**HUBT BROKER**  
AUTOMATIC, SECURE DATA TRANSFORMATION

# EDI INTEGRATION

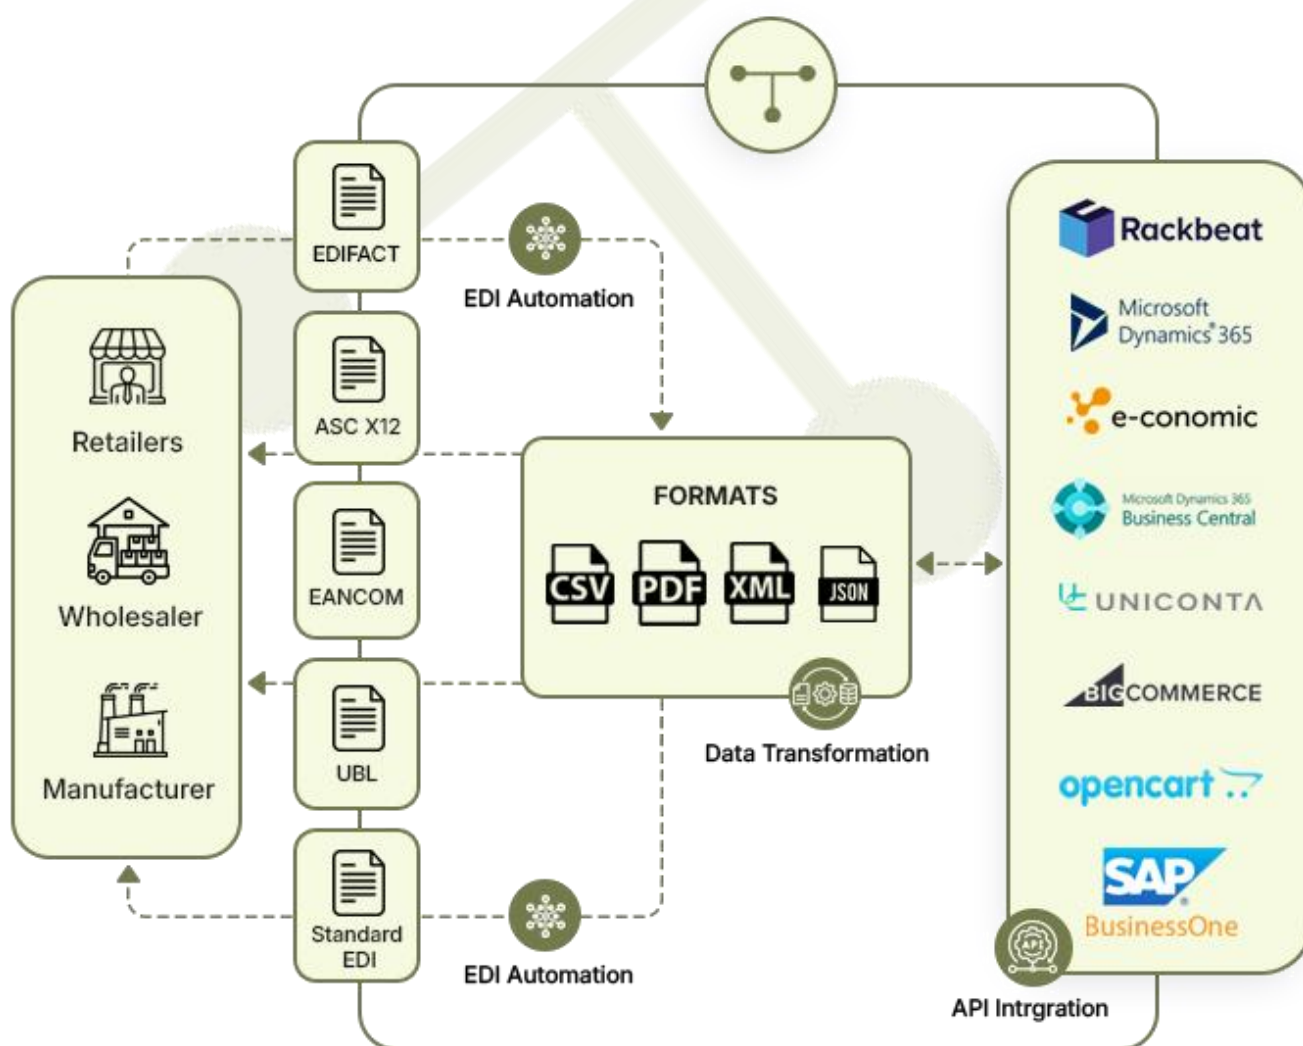

# Product Description

**Quick Summary** - Automate and streamline your B2B document exchange with HubBroker's EDI integration.

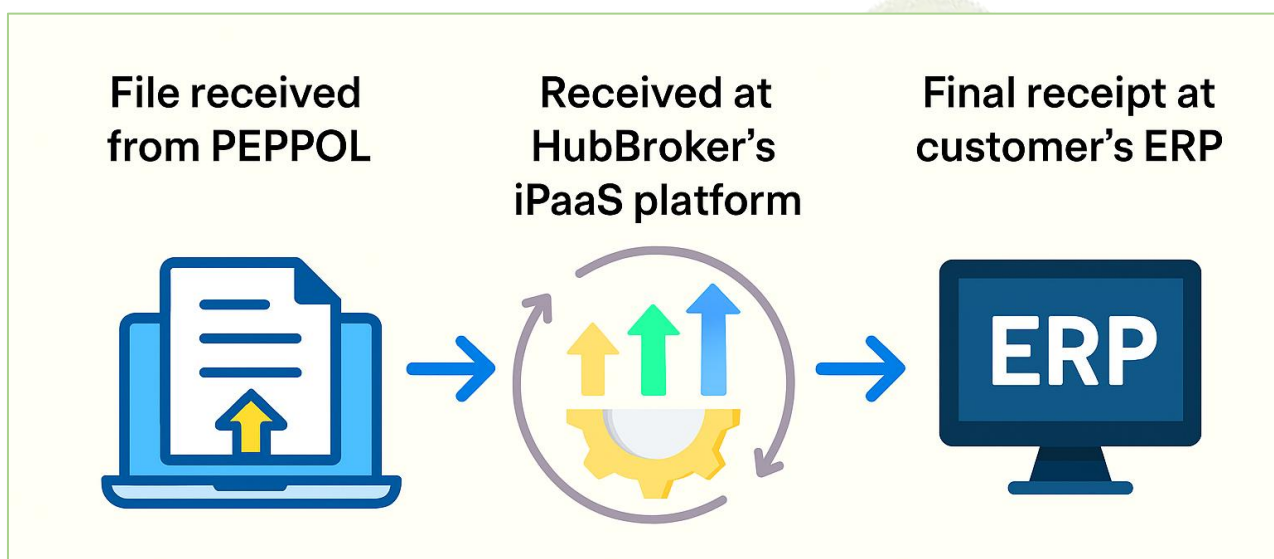

**What it does?** - HubBroker's **EDI Integration** empowers businesses to digitize and automate the exchange of critical business documents such as invoices, purchase orders, shipping notices, and credit notes between trading partners. Supporting a wide range of international EDI standards, our solution integrates seamlessly with ERP, CRM, E-commerce store, and logistics platforms, ensuring end-to-end accuracy, compliance, and efficiency.

Built within our unified iPaaS environment, the EDI integration provides real-time visibility, error handling, and customizable workflows, helping organizations scale their digital operations while reducing operational overhead.

## Key Features

- **Multi-standard EDI support** - EDIFACT, OIOUBL, Peppol BIS, Finvoice, and more
- **Real-time exchange & monitoring** - Instant processing with tracking and notifications
- **Custom mappings & validation** - Tailored business rules to match partner and ERP requirements
- **Seamless ERP & system integration** - Connect with Microsoft Dynamics 365, Unica, SAP Business One, e-conomic, Rackbeat, Shopify, and other platforms
- **Secure & compliant transmission** - Encrypted, GDPR-compliant, and aligned with global standards
- **Dashboard & analytics** - Gain visibility into document flows, errors, and performance KPIs

## Benefits for Your Business

- **Error reduction & compliance** - Eliminate manual entry, avoid costly mistakes, and meet trading partner requirements
- **Process efficiency** - Faster order-to-cash and procure-to-pay cycles
- **Seamless connectivity** - Integrate with suppliers, customers, and partners effortlessly
- **Scalable automation** - Easily adapt to new partners, markets, and compliance frameworks
- **Improved supply chain performance** - Enhance collaboration, transparency, and operational agility

With HubBroker's EDI Integration, your business gains a future-proof solution that not only digitizes your B2B transactions but also continuously adapts to evolving standards and partner needs.
