

HUBT BROKER
AUTOMATIC, SECURE DATA TRANSFORMATION

Peppol -The Global Standard for E-Invoicing and B2B

What is Peppol?

Peppol (**PanEuropean Public Procurement Online**) is a secure, standardized network that enables businesses and public authorities to exchange electronic documents -such as invoices, orders, and despatch advices -across borders and systems. It eliminates the need for point to point integrations by providing a single connection to a trusted network of certified **Peppol Access Points**.

Why Peppol Matters

Peppol ensures that companies can send and receive invoices in a compliant, structured, and interoperable format - regardless of country, ERP system, or trading partner. It plays a central role in the European Union's digital transformation, supporting **EN16931 standards and national B2B/B2G invoicing** mandates across multiple countries.

How the Peppol Network Works

Peppol operates through a 4-corner model:

1. **Sender** -The business initiating the transaction (e.g., supplier).
2. **Sender's Access Point** -The certified provider (like HubBroker) that securely sends the document.
3. **Receiver's Access Point** -The certified provider that delivers the document.
4. **Receiver** -The business or authority receiving the document.

Once connected through a Peppol Access Point, businesses can exchange electronic documents with any other participant in the network - worldwide.

Benefits of Using Peppol via HubBroker

- **Global Interoperability:** One connection to reach all Peppol participants.
- **Compliance Assurance:** Fully aligned with EU invoicing and VAT directives.
- **Automation & Efficiency:** Eliminates manual entry and reduces processing errors.
- **Security & Reliability:** Encrypted data exchange through verified endpoints.
- **Scalability:** Seamless onboarding of new partners or countries without custom integrations.

HubBroker as Your Certified Peppol Access Point

HubBroker ApS is a certified **Peppol Access Point provider**, fully compliant with the Peppol and OpenPeppol standards.

Through our **iPaaS integration platform**, we offer endtoend automation for invoicing, order management, and document exchange - connecting your ERP, accounting, or eCommerce systems directly to the Peppol network.

Supported Peppol Document Types

- Invoice / Credit Note (BIS 3.0)
- Order / Order Response
- Despatch Advice
- Catalogue and PunchOut documents (BIS 3A series)

In Short

Peppol is the future of standardized, crossborder invoicing -and HubBroker ensures your business is ready for it.

Connect once. Trade with everyone. Stay compliant everywhere.
