

FACT24 shines in a new, modern design

FACT24 will soon be available in a new design.

What will be different?

The FACT24 user interface has been redesigned and now has a new, lighter modern look. Icons are easier to understand and larger, and colour contrasts have been boosted for enhanced readability. As a result, the pages have a clearer layout which makes working with FACT24 even simpler.

Sneak preview

We are delighted to give you the chance of an advance look at the new design, which will go live in calendar week 43. The precise release date will be announced in a banner at the bottom of the FACT24 start page.

To give you a clearer picture of what has changed, we have compiled a list of pages with the most obvious changes (see below).

In each case the top screenshot shows the FACT24 page in the new design, while the bottom picture shows the previous familiar FACT24 design.

Please note that all the functions are in the same places as before, so that you can continue working with FACT24 without any changes.

The new FACT24 start page

Comparison of new and previous design

FACT24 start page

The function areas on the new FACT24 start page now have different colours. The left of the page still contains the main functions from the **Administration** area (light grey fields), while the right of the page shows the main functions from the **Operating** area (light blue fields).

Bright blue has been reserved for important buttons. This means you can immediately see where to go to create e.g. a new alarm, a new static group or a new person.

We have also redesigned the data export icons (red = whole enterprise, orange = organisational unit). As before, the icons are located at the top right of the start page.

Alarm monitor for FACT24 alarms

The alarm monitor view has also been redesigned for greater clarity.

The FACT24 alarm monitor has got a new feature by adding the function "Report".

In future, status reports can be downloaded directly from the alarm monitor. You will be able to open a list showing all confirmations received so far.

If further confirmations are received, the report can be downloaded again.
