The open internet is the primary way to advertise online outside of the Facebook and Google duopoly.

\*Relative sizes are from Jounce Media's estimates based on data from eMarketer, GroupM, Magna Global, & public company earning reports.

## Access the Entire Web

AdCritic delivers ads across the open internet ecosystem. Your ads can appear on over **60,000+** websites relevant to your target audience. Here's a partial list of where ads appear with AdCritic.

# Internet Ad Formats

Choose

## Native

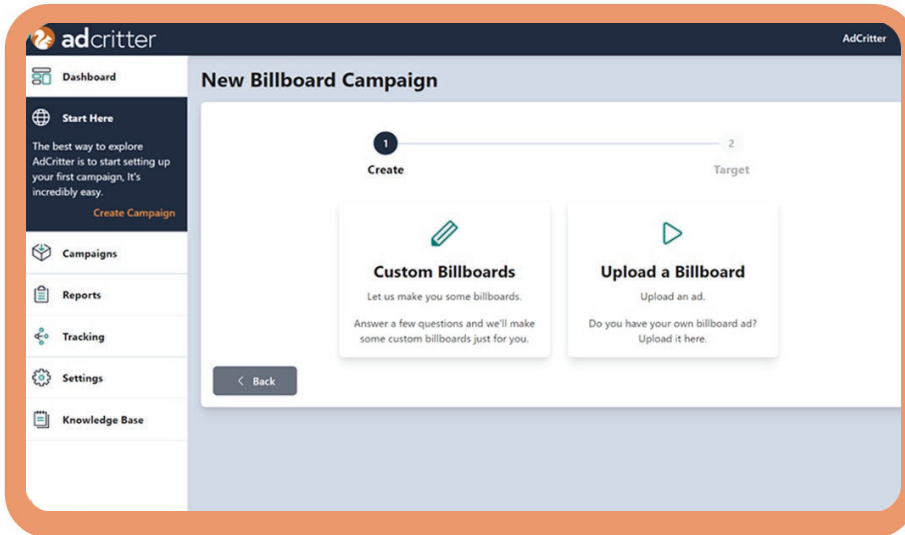

Use native ads to entice your audience to act. Native ads have the highest click-through-rate (CTR) of any digital ad format due to their ability to fit seamlessly into their environment (e.g. website structure and device type).

## Display

Use display ads to grab your audiences attention and where the visual message is primary to your business goals. Ideal for remarketing campaigns. Display ads also have the ability to provide motion via HTML5 and GIFs.

# Billboards

Digital billboards are one of the best ways to promote your brand across a city or region. Over time, even with a modest budget, virtually everyone in town can know about your small business. Digital billboards grab drivers' attention more effectively, and because they are sold in small time increments of 7 to 10 seconds, they cost much, much less. Digital billboards are one of the very best ways to get your message out to an entire city. Thanks to AdCritic, your business can use them, too.

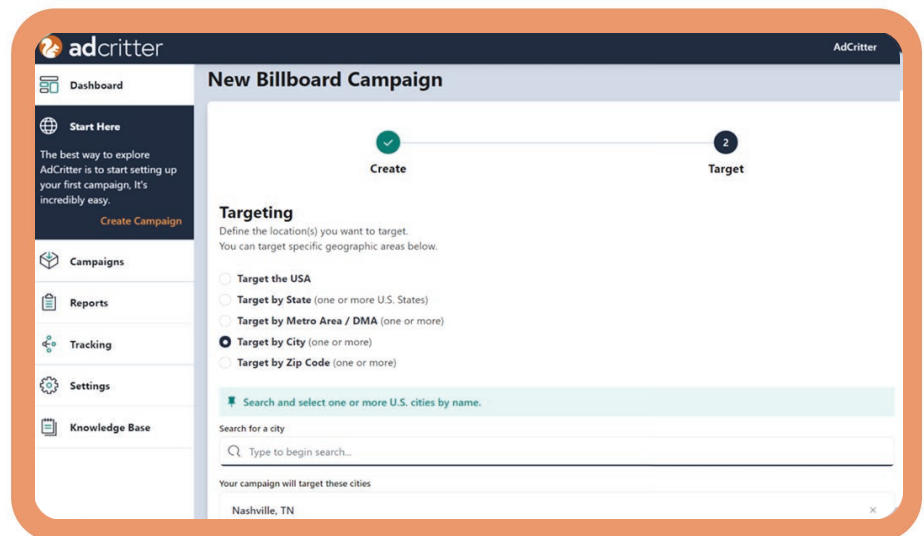

## Easy Billboard Design

- Request a custom billboard
- Upload your own

## Choose Your Locations

- Target by state, metro area, city or zip code. Even the entire country!

# Tracking/Audiences

Copy and paste pre-generated code snippets into your website to activate site retargeting and audience building features. These codes are available in the tracking section of the dashboard.
