

Installation Bellevue Apps on iPad/iPhone

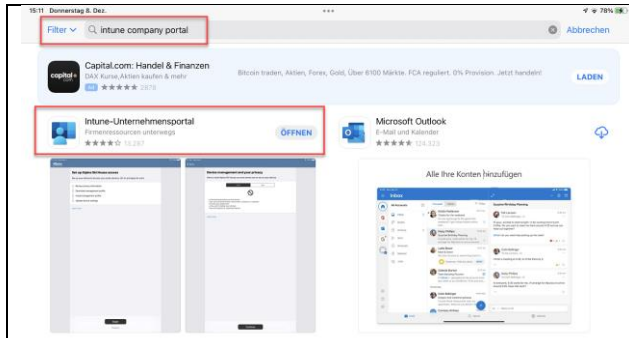

Contents

Pre-requisites and information	2
Register your device on the Bellevue Company Portal	3
Open Outlook for the first time	9
Add additional App with the Company Portal (optional)	10
Company Portal Overview	11

Pre-requisites and information

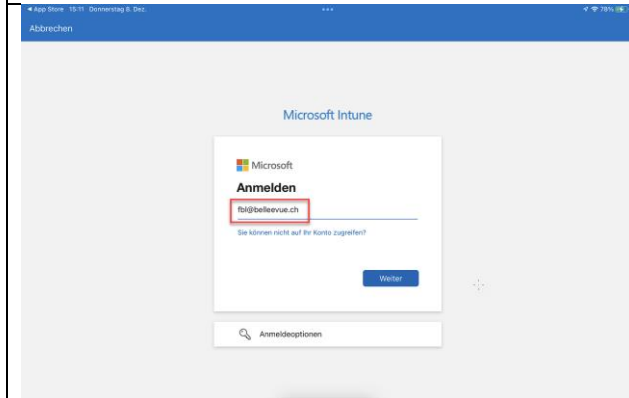

- Please be aware to have a 6 digit code configured on your Iphone/Ipad (code to unlock device)
- If you have installed the old Citrix SecureMail application, please uninstall all corresponding apps (SecureMail, SecureWeb, SecureHub)
- Also remove the old Profile/Certificate inside the Apple Settings (General – VPN and Device management)
- Only Outlook will be installed automatically, other apps can be installed within the “Intune Company Portal” as described below

Register your device on the Bellevue Company Portal

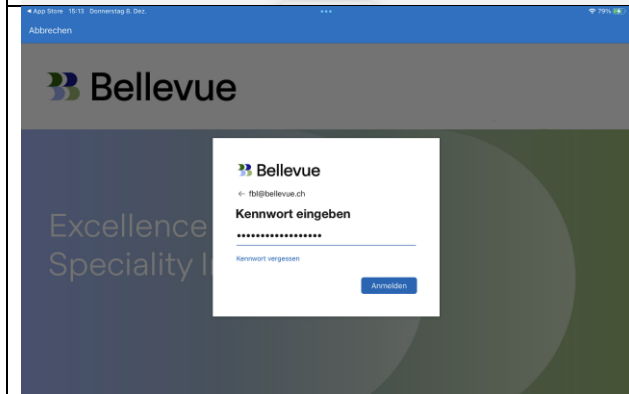

Open AppStore and search for "Intune Company Portal"

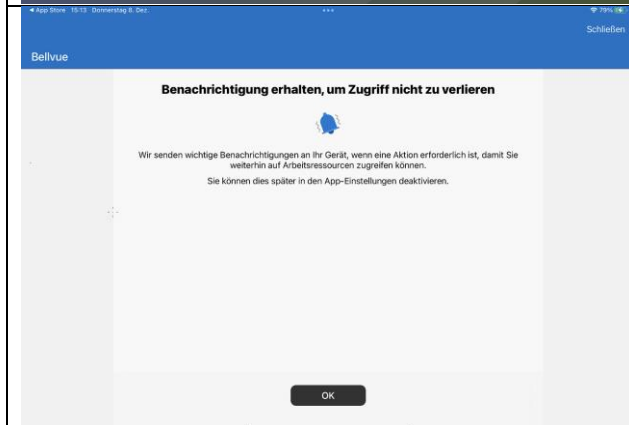

Download/Open "Intune-Company Portal"

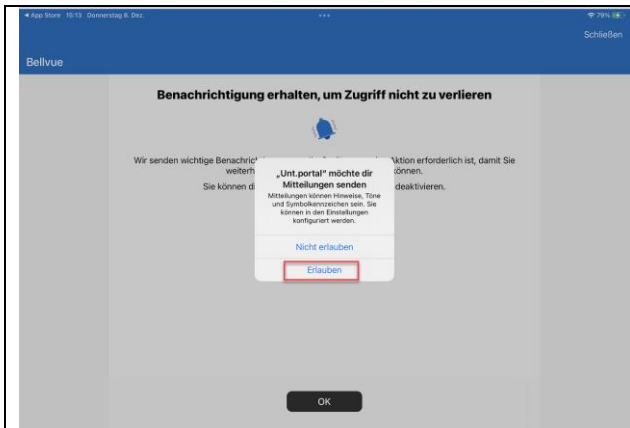

Sign-in with your Bellevue E-Mail address

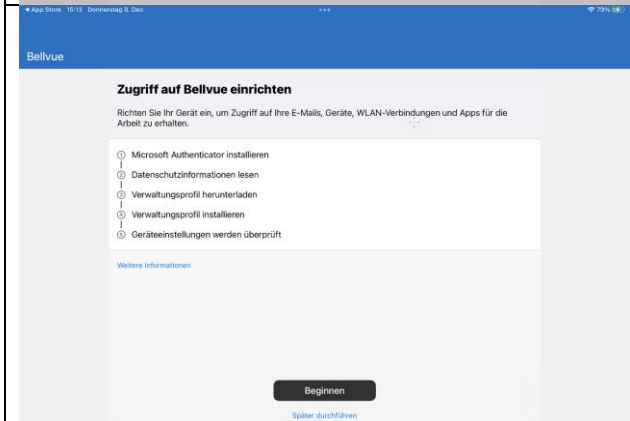

Bellevue Password

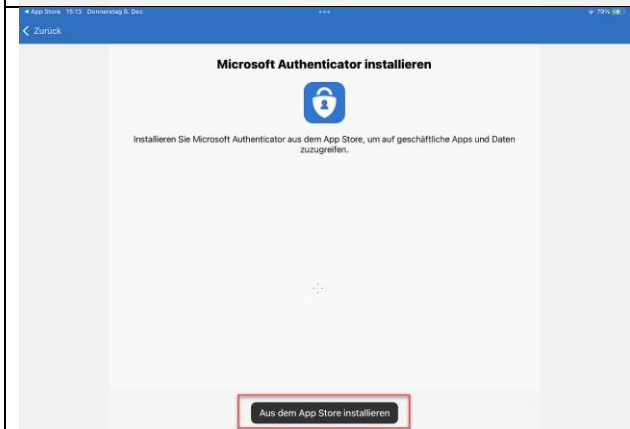

OK

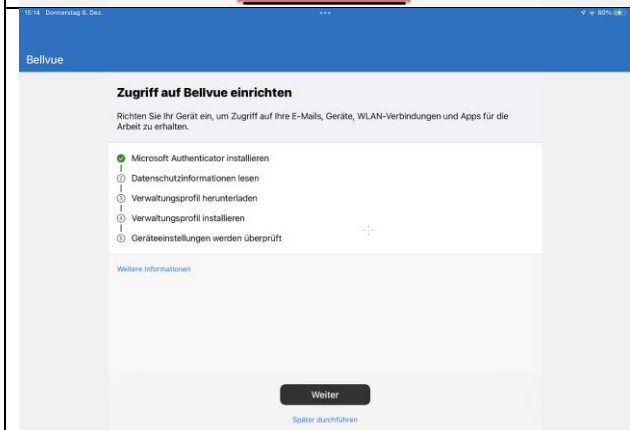

Allow

Start Deployment Wizard

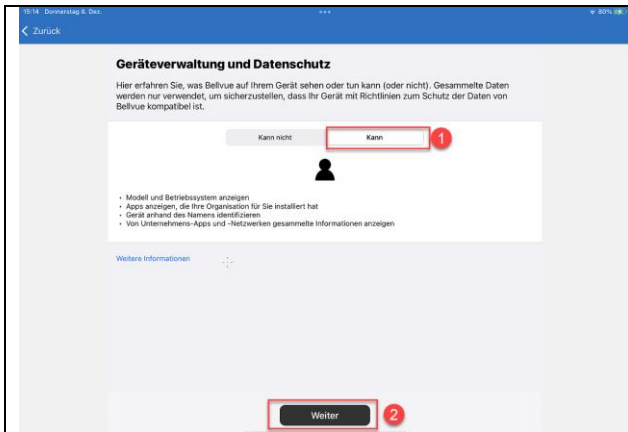

If not already done, install "Microsoft Authenticator" from the AppStore

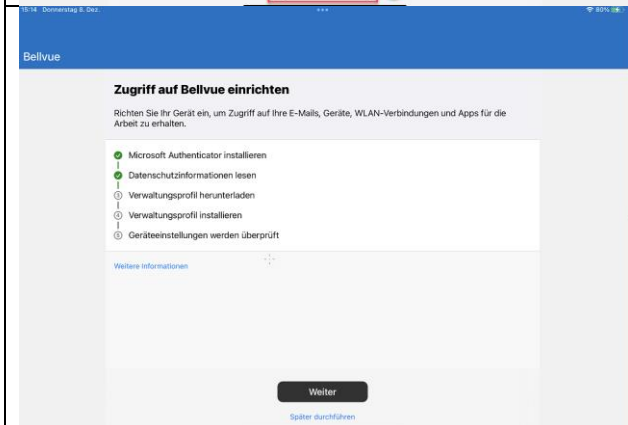

Afterwards, continue inside the "Intune Company Portal"

Next

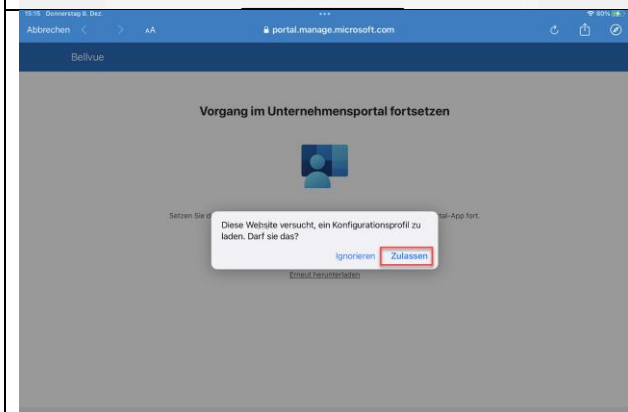

Select "can"

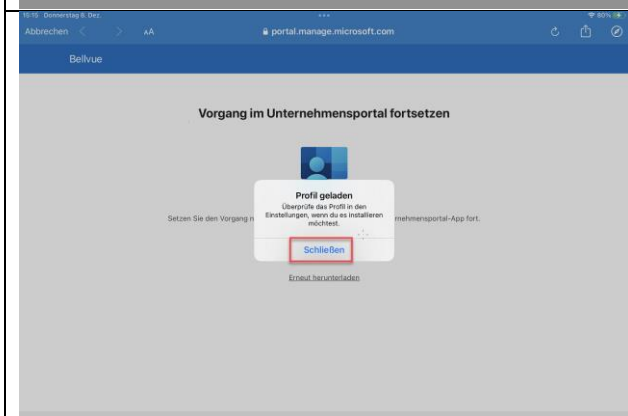

Next

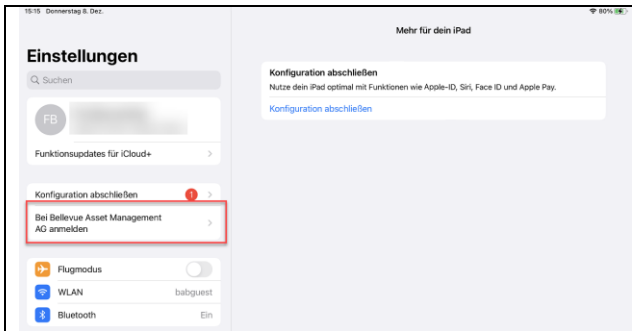

Next

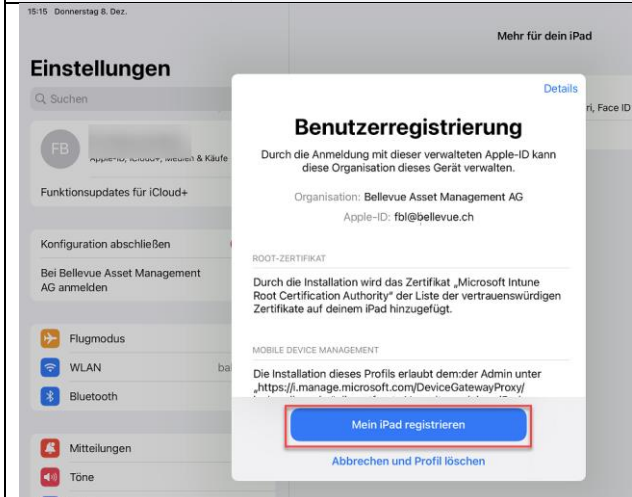

Allow

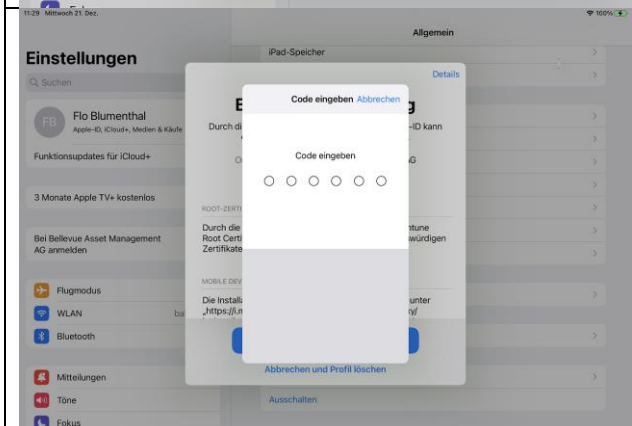

Close and switch to the Apple Settings

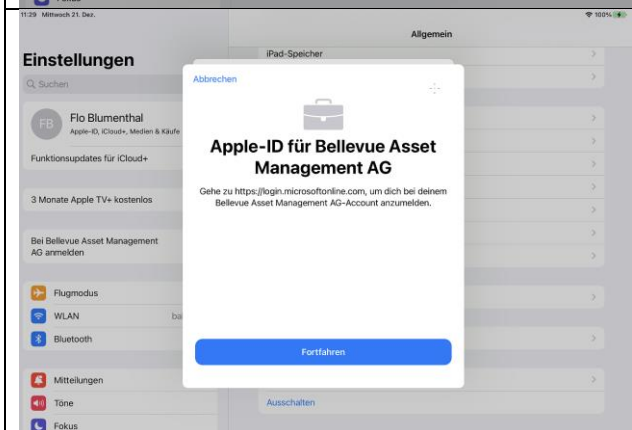

Open Profile Settings by choosing the provided option (red marked box)

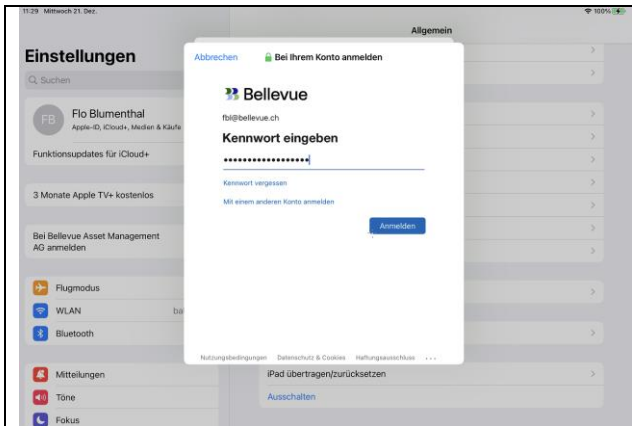

Register my iPad or iPhone

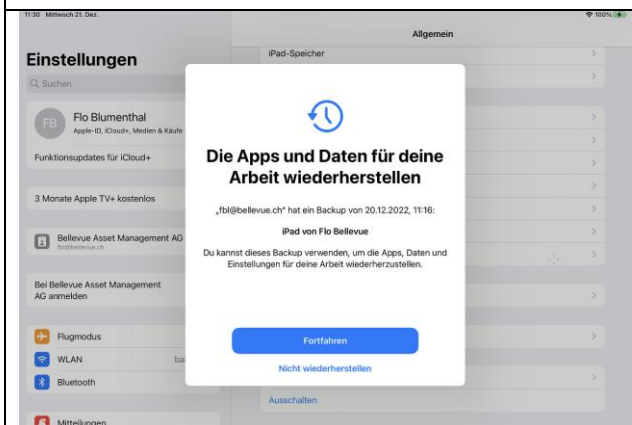

Enter your iPad or iPhone pin

Continue

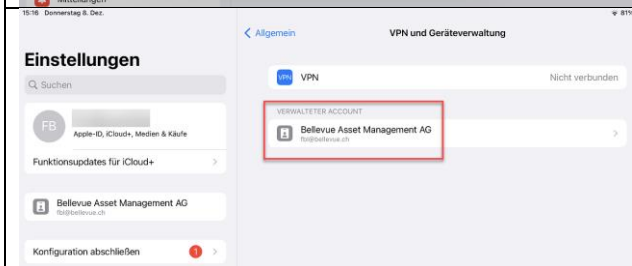

Enter your Bellevue password

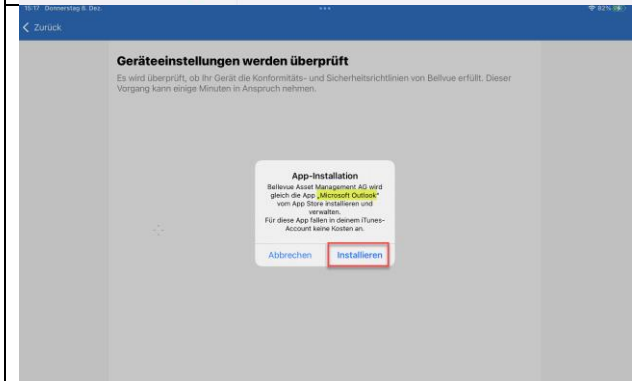

Approve the request on the Microsoft Authenticator (eg. on your iPhone)

Optional: Decide to restore a backup (if available)

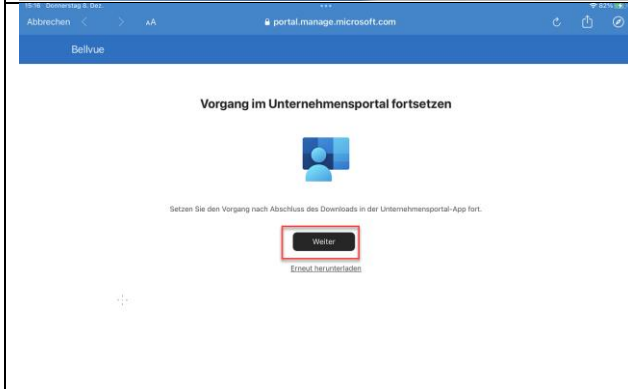

Your profile is now configured

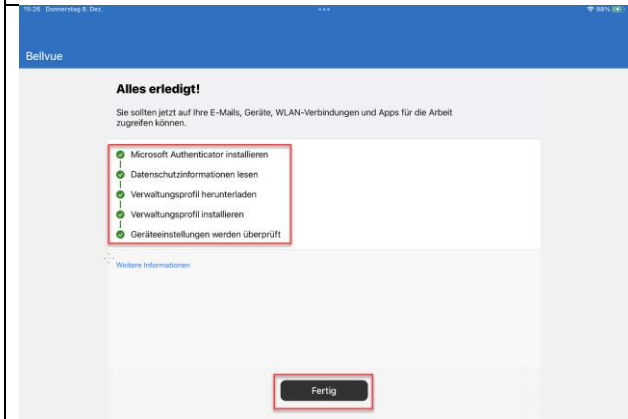

You will be asked to install Microsoft Outlook (default app for the Bellevue setup)

Open "Intune Company Portal" again

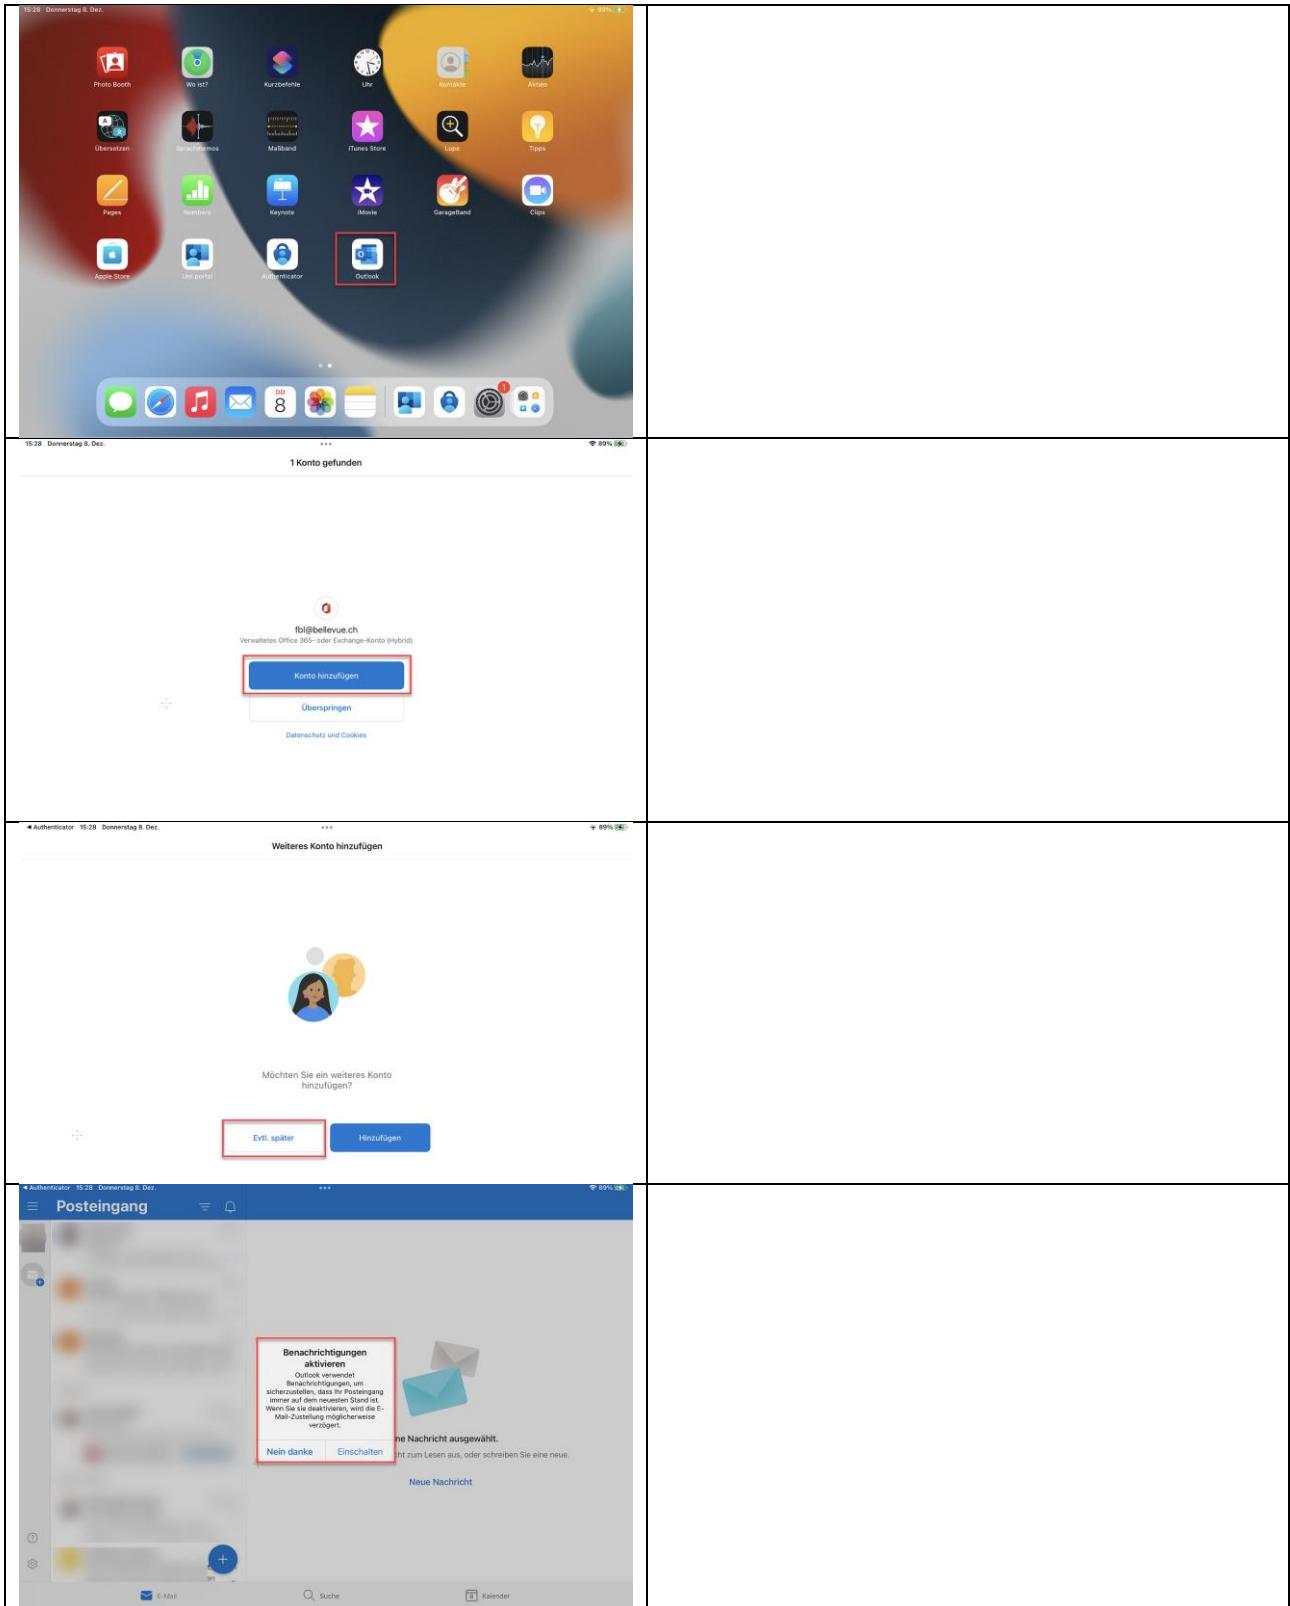

Next

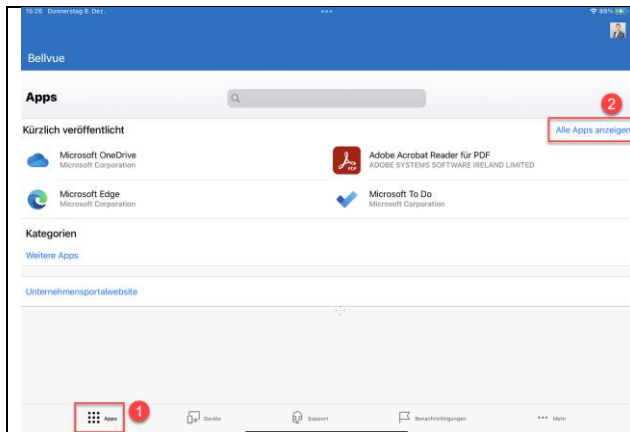

Finish when all steps are green marked

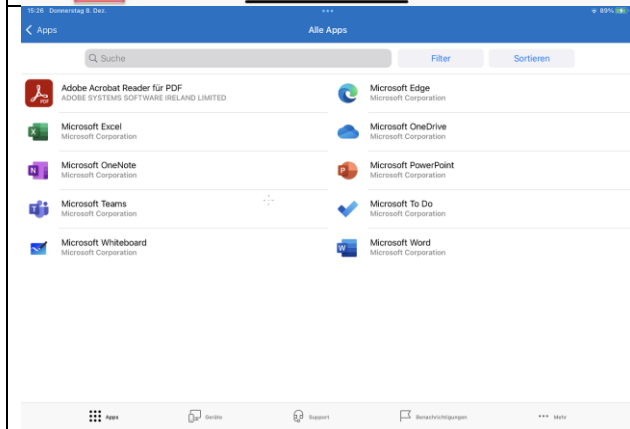

Open Outlook for the first time

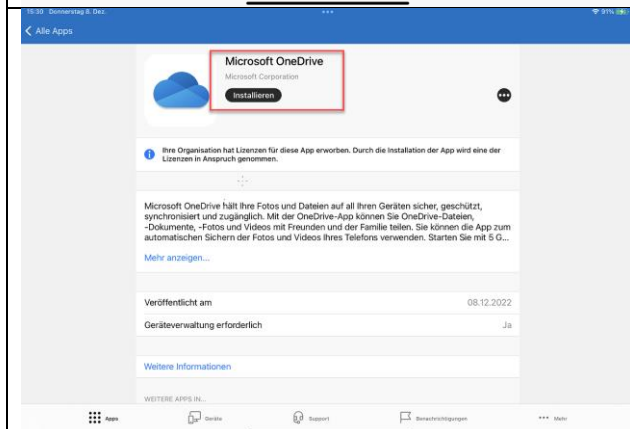

Add additional App with the Company Portal (optional)

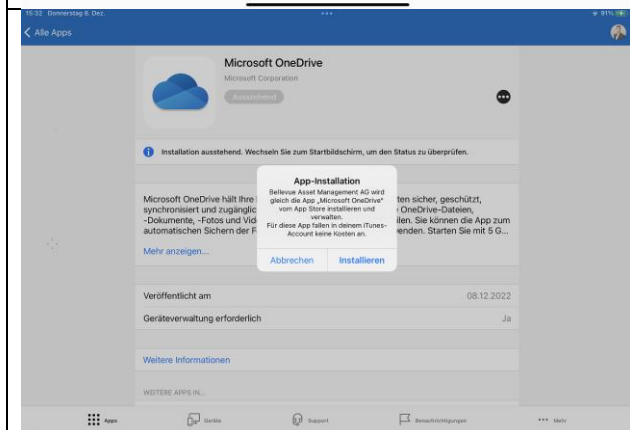

Go to Apps (1) and choose display all apps (2)

Select app

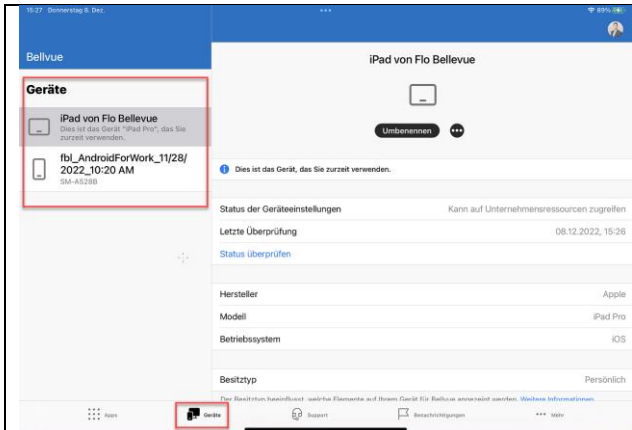

Install

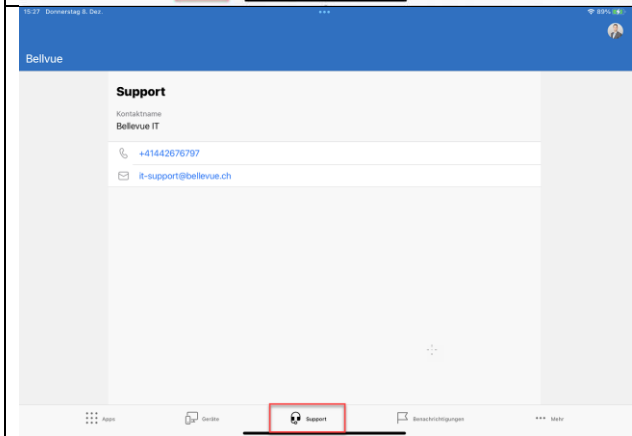

Wait for the pop-up and select install

Company Portal Overview

On the register “Devices” all your configured mobile devices are listed

You will find the IT contact information on the register “support”
