

 The first step is to open the **DISH Order app** on your terminal.

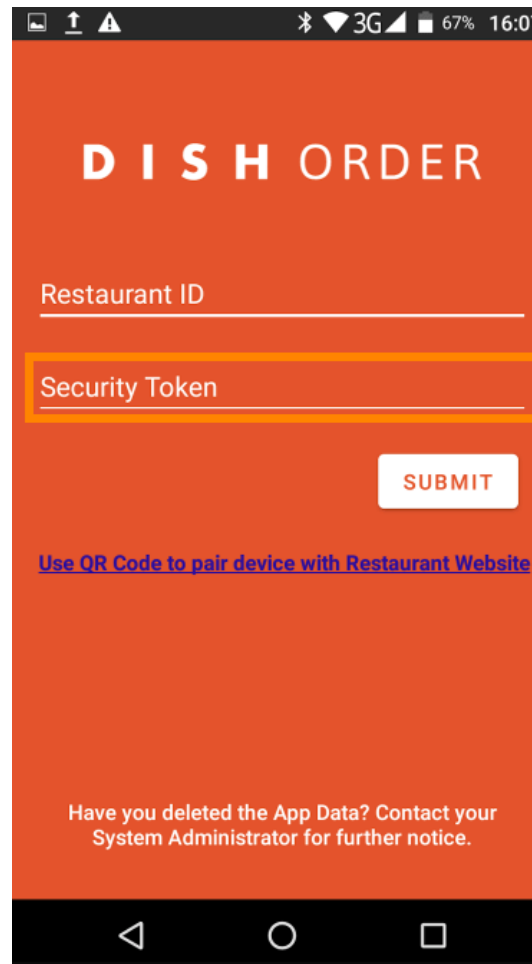

Now enter your **restaurant ID**. Note: You can find it in your admin panel. Please watch the video to get additional instructions <https://bit.ly/3td3gux>.

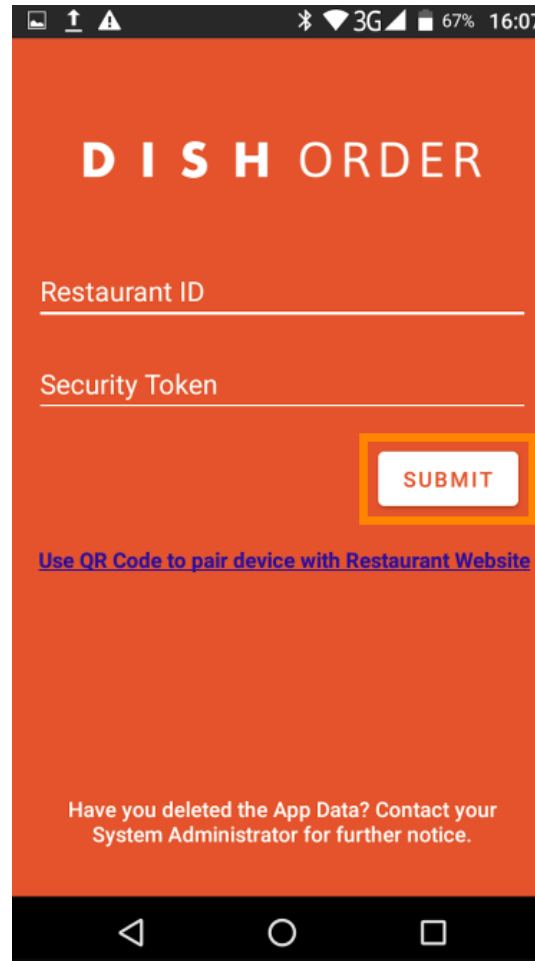

The screenshot shows the DISH ORDER app interface on a mobile device. The screen has a red background with the text "DISH ORDER" at the top. Below the title, there is a text input field labeled "Restaurant ID" which is highlighted with a yellow border. Underneath that is a "Security Token" input field. A white "SUBMIT" button is positioned to the right of the Security Token field. Below the button, there is a blue link that says "Use QR Code to pair device with Restaurant Website". At the bottom of the screen, there is a message: "Have you deleted the App Data? Contact your System Administrator for further notice." The status bar at the top shows the time as 16:07, 67% battery, and 3G connectivity. The Android navigation bar is visible at the bottom.

And afterwards your **security token**. Note: You can find it in your admin panel. It is the API key. Please watch the video to get additional instructions <https://bit.ly/3td3gux>.

 Once you entered your information click on **submit** to log in.

Alternatively click on the link to scan a QR code to log in. Note: the camera at the back of the order terminal will open and you scan your QR code. Please watch the video to get additional instructions <https://bit.ly/3td3gux>.

That's it. Your order terminal is now connected with your account. **Note: Please continue with testing your order terminal <https://bit.ly/322DfBP>. Afterwards you can directly receive orders from your customers.**
