Too many guests in house?
Pause online reservations

Designed by Hospitality Digital GmbH. All rights reserved.

If you choose to use seats-based setup, reservations will be managed according to the total number of seats available. If you choose table-based setup, all reservations will be assigned one or more tables automatically. You will have the possibility to modify the automatically assigned tables. Only you can see the assigned tables. Your guests are not shown tables during the reservation process.

You are using table-based setup 

Area(s) 

If your establishment has multiple areas or rooms, you may want to define an area before you start assigning tables to it. e.g.: Indoor, Outdoor, Bar, Lounge, etc. Your active areas are listed below:

indoor

Table(s) 

Tables are assigned to specific areas. When you pause a whole area, all tables assigned to that area will be paused. This may make some of your future reservations invalid. Don't worry, you can just move them to other available table(s).

Table Name	Seats (6)	Area Name	Status
A	4	indoor	Active
B	2	indoor	Active

Elija entre la configuración basada en mesa y basada en asientos usando el **interruptor** designado .
 Nota: la configuración basada en mesas asignará reservas automáticamente a las mesas. La configuración basada en asientos administrará las reservas con respecto al número total de asientos disponibles.
