

Klik op **INSTELLINGEN** .

Klik op het **veld** POS-apparaatnaam om dit te bewerken of te wijzigen. Let op: dit is optioneel.

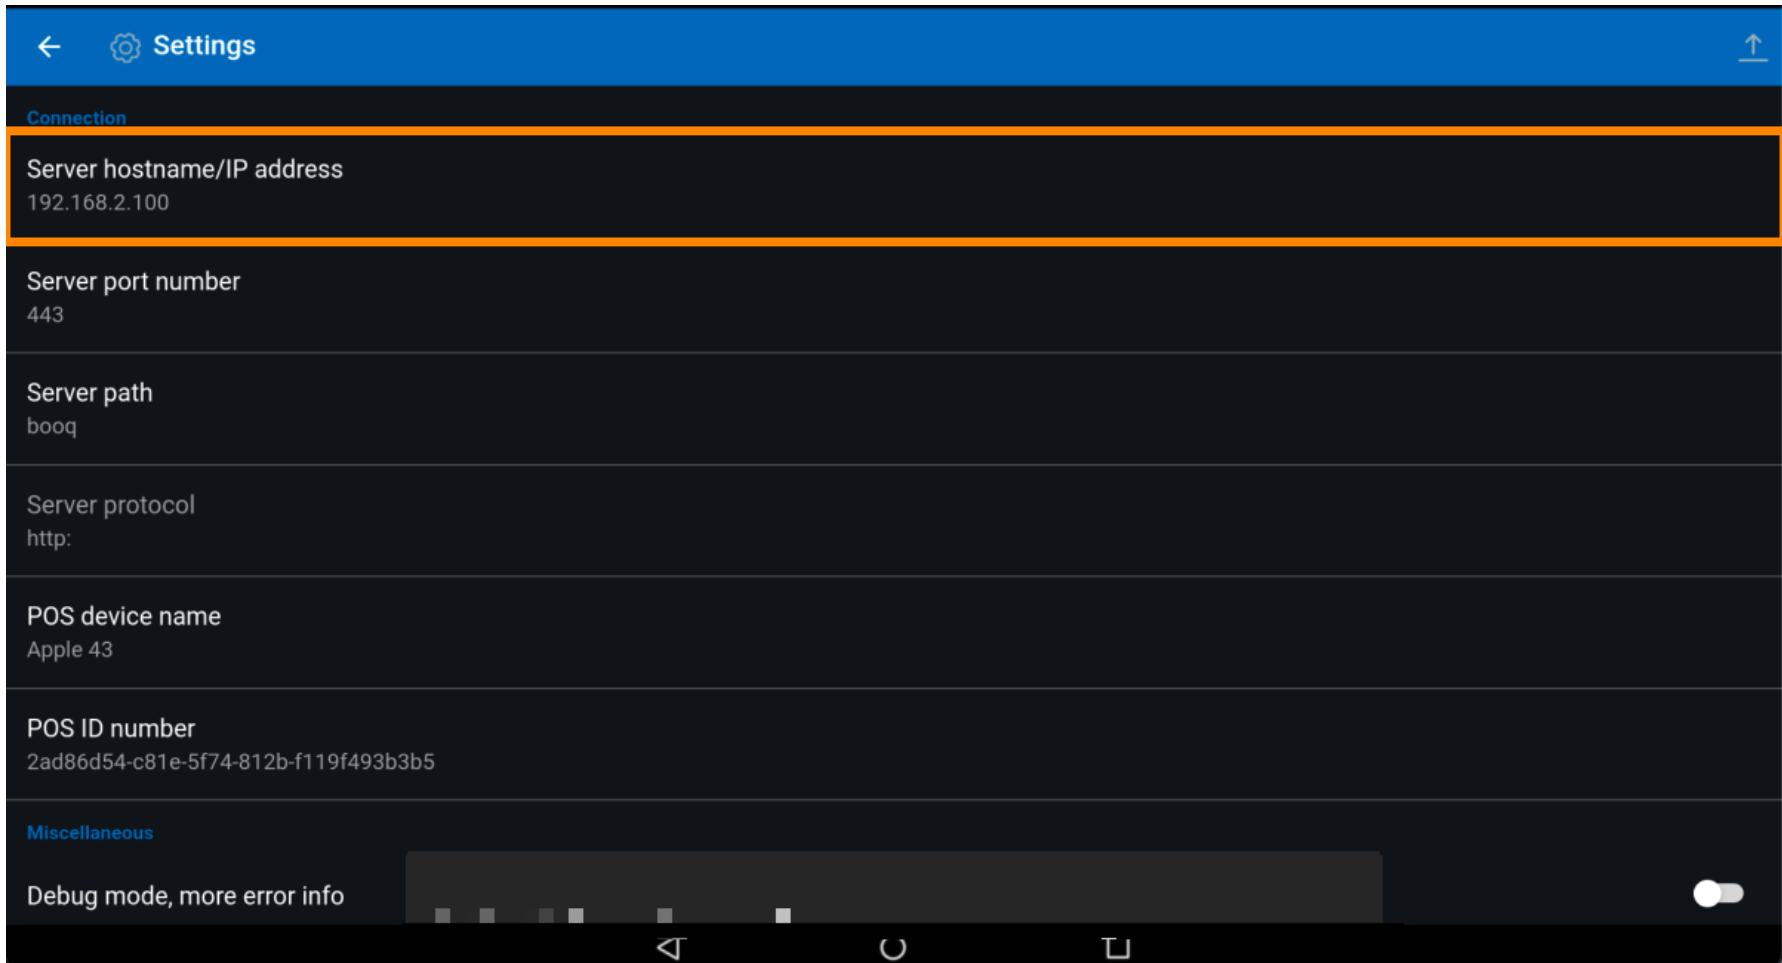

The screenshot shows the 'Settings' screen of the booq app. The screen has a blue header with a back arrow, a gear icon, and the title 'Settings'. Below the header, there are several settings sections. The 'Connection' section includes fields for 'Server hostname/IP address' (192.168.2.100), 'Server port number' (443), 'Server path' (booq), and 'Server protocol' (http:). The 'POS device name' field, containing 'ONEPLUS A5000', is highlighted with a thick orange border. Below this is the 'POS ID number' field with the value '2ad86d54-c81e-5f74-812b-f119f493b3b5'. The 'Miscellaneous' section at the bottom has a 'Debug mode, more error info' toggle switch which is currently turned off. The Android navigation bar is visible at the bottom of the screen.

| Section         | Field                       | Value                                |
|-----------------|-----------------------------|--------------------------------------|
| Connection      | Server hostname/IP address  | 192.168.2.100                        |
|                 | Server port number          | 443                                  |
|                 | Server path                 | booq                                 |
|                 | Server protocol             | http:                                |
| POS device name | POS device name             | ONEPLUS A5000                        |
|                 | POS ID number               | 2ad86d54-c81e-5f74-812b-f119f493b3b5 |
| Miscellaneous   | Debug mode, more error info | Off                                  |

Klik op het **veld** Server hostnaam/IP-adres.

| Debug mode, more error info | Off                                  |

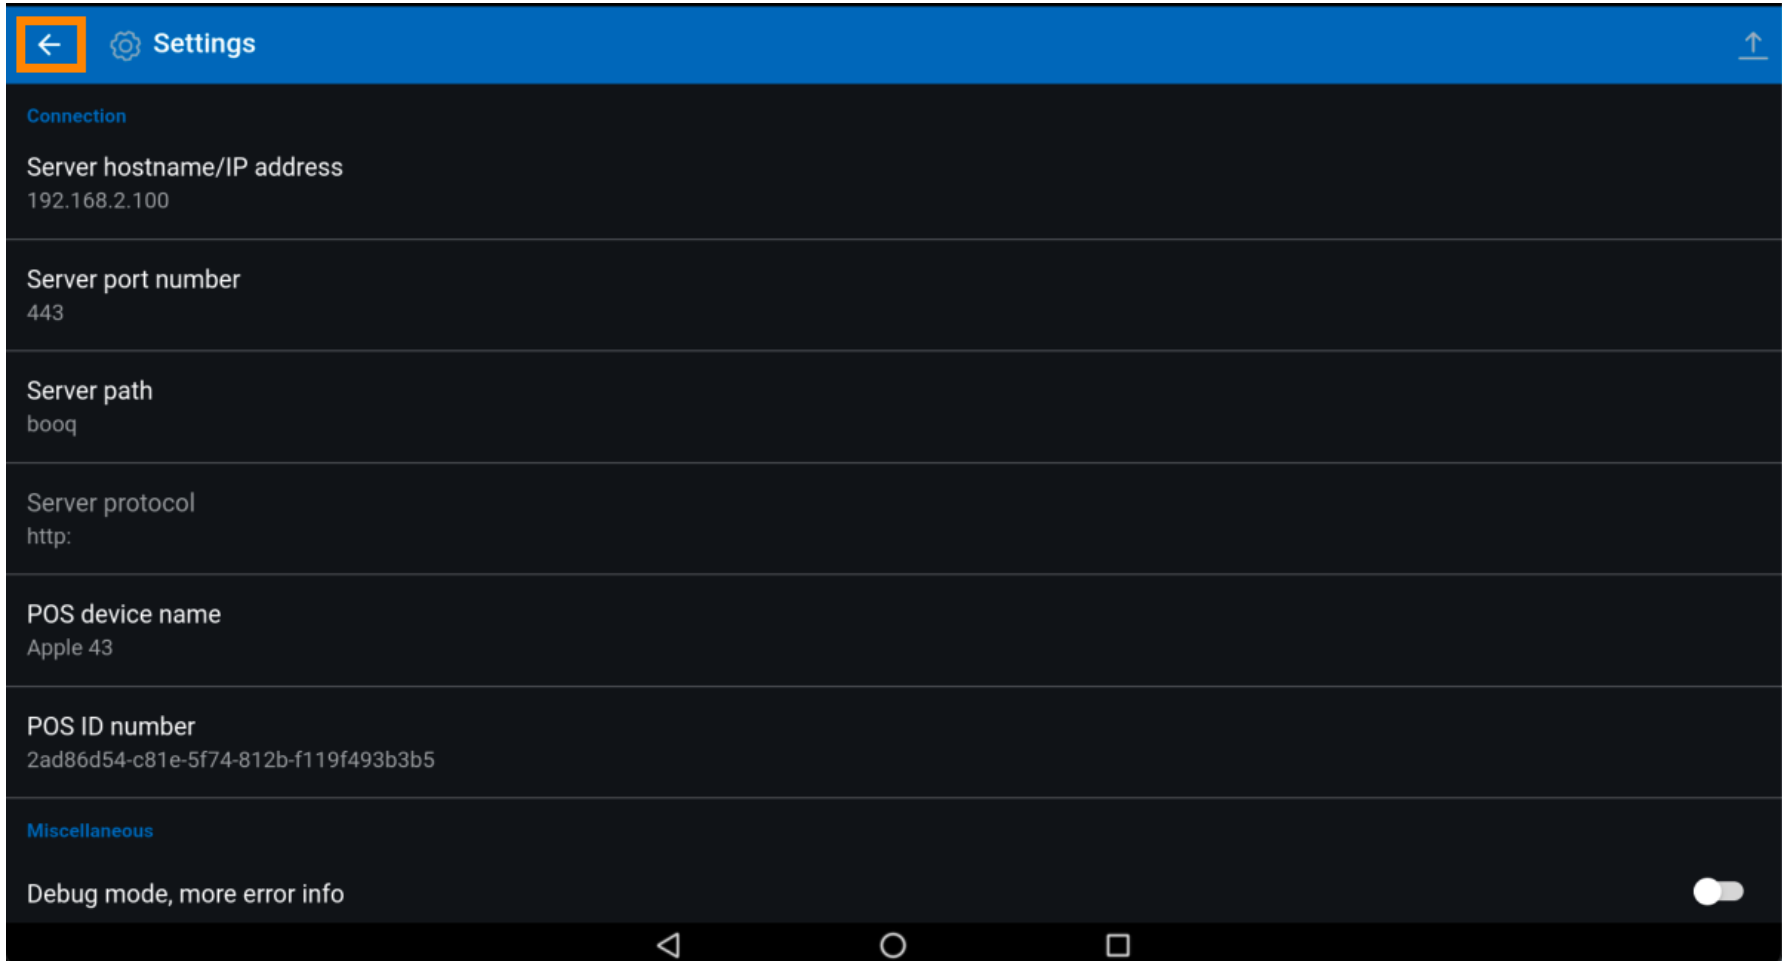

Bevestig door op **OK** te klikken .

The screenshot shows the 'Settings' screen of the booq app. A modal dialog is displayed over the settings, titled 'Server hostname/IP address'. The dialog contains a text input field with the value '192.168.2.100'. At the bottom right of the dialog, there are two buttons: 'CANCEL' and 'OK'. The 'OK' button is highlighted with an orange border. The background settings are partially visible, showing fields for 'Server hostname/IP address', 'Server port number', 'Server path', 'Server protocol', 'POS device name', 'POS ID number', and a 'Debug mode' toggle.

| Setting                     | Value                                |
|-----------------------------|--------------------------------------|
| Server hostname/IP address  | 192.168.2.100                        |
| Server port number          | 443                                  |
| Server path                 | booq                                 |
