The main content area displays a red 'CANCEL DOMAIN CONFIGURATION' button and a blue notification box stating 'domain have not yet been configured. Please follow the adjacent instructions.' Below this is a detailed guide titled 'How to configure the DNS settings of thejonoribeiro.com' with seven numbered steps:

- 1 Login to your domain providers' administration interface using your credentials.
- 2 Open the domain configuration section and see configuration for domain **thejonoribeiro.com**.
- 3 Open DNS settings for domain **thejonoribeiro.com**.
- 4 Enter a new DNS entry or modify an existing one. You can either use a **CNAME** or an **A** record on your domain, either on the domain itself, on its www subdomain or on both. For **CNAME** record: Enter the target address "**website.dev.dish.co**". For **A** record: use the IP address of **website.dev.dish.co: 35.201.75.247** For further details please check your domain provider.
- 5 It can take up to several hours until the changes become active. We will notify you by email once your website is available at **thejonoribeiro.com**.
- 6 For further explanations about specific terms, click [here](#) (glossary)
- 7 Please note: When you use an A Record for your custom domain, please make sure that there is no AAAA record set. If there is an existing AAAA record please remove it before you continue. CAA record: The domain must either have no CAA record at all or it must have one CAA record containing "**0 issue letsencrypt.org**". Additional other CAA records may also exist - it is important that one exists that allows Let's Encrypt.
