These are the steps to get your new V400c Plus Payment Terminal up and running.

When you have completed these steps, you are ready to process payments!

A more detailed guide can be found in the following.

STEP 1: INSPECTING THE TERMINAL

Since payment terminals process sensitive card data, it is crucial to verify that the terminal you received is the correct one and has not been tampered with.

1.1 VERIFY THE BOX CONTAINING THE TERMINAL

- The security seal, a red label with a bar code and a number, is still intact and affixed across the lid of the box.

1.2 CHECK THE SERIAL NUMBER

- Break the security seal, take the terminal out of the box, and check if the **serial number (S/N)** on the terminal matches the serial number on the box.

CAUTION: Inspect the terminal for tampering. Check for missing seals or screws, additional wires or labels, holes in the device, and anything inserted in or attached to any part of the terminal.

If any of the above checks fail, please contact our DISH Support Team immediately at www.dish.co/contact.
