

Welcome to the DISH POS app. In this tutorial, we show you how to send your customer a digital receipt.

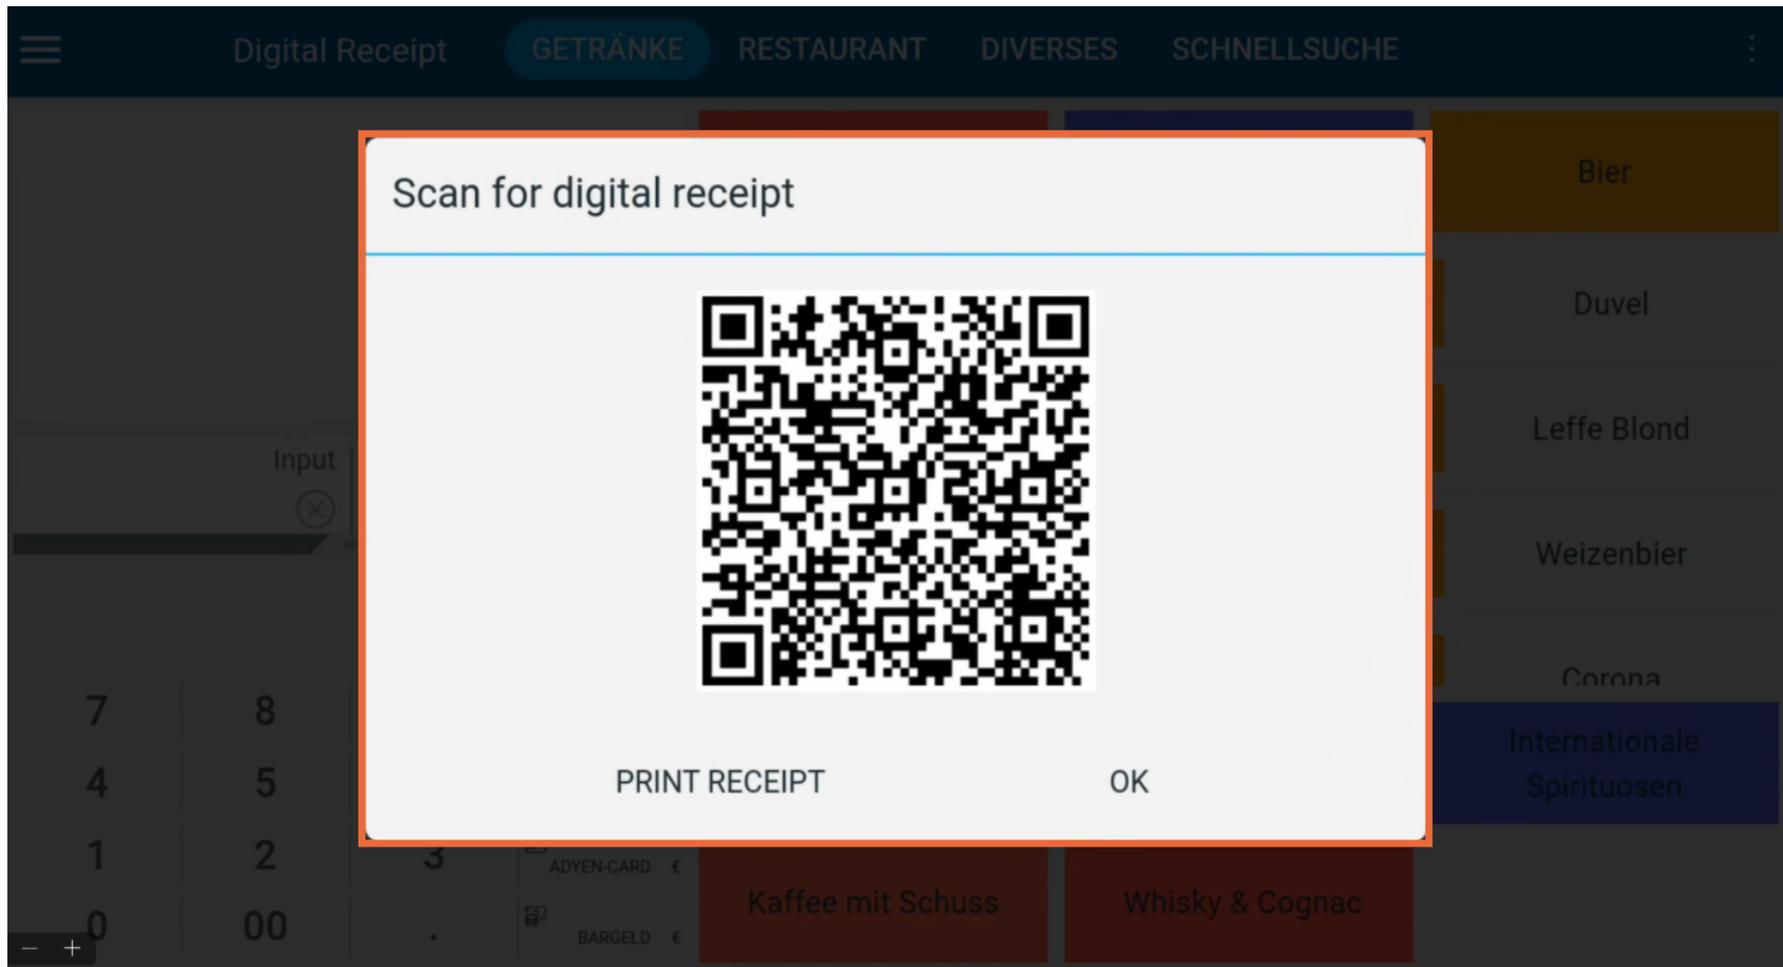

First, select the corresponding **table**.

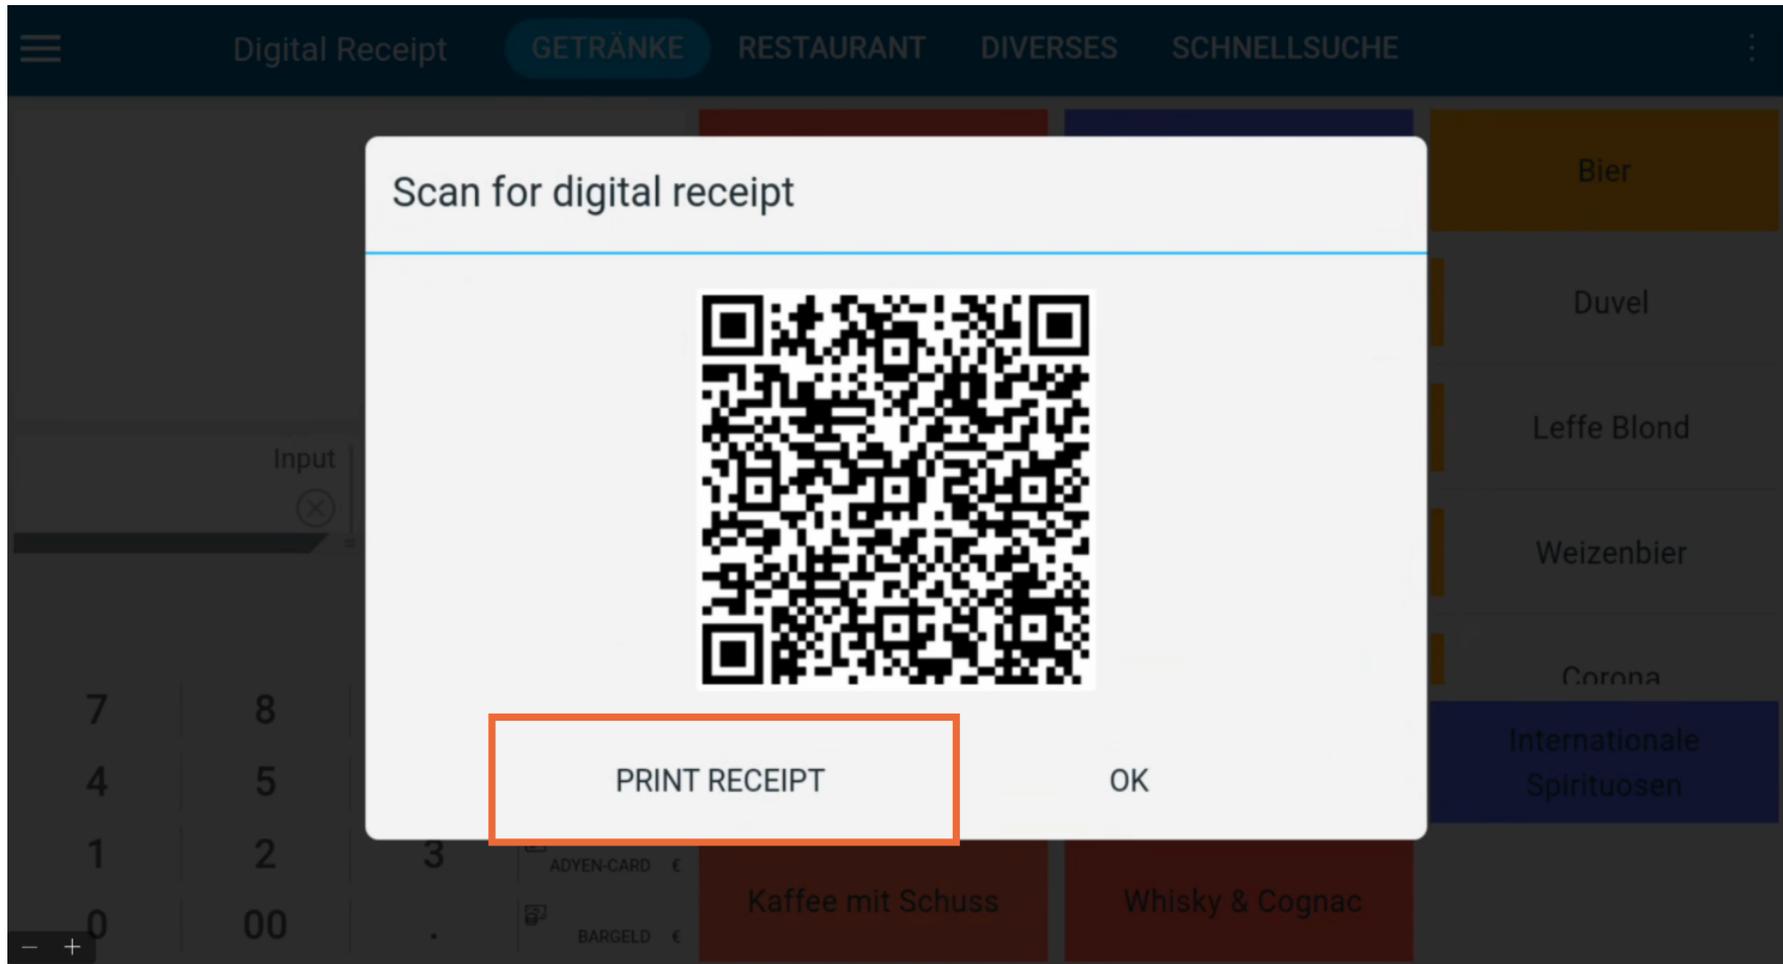

- Once your customer is ready chose the payment method he would like to pay with. In this example we chose **cash**.

The screenshot shows a POS system interface for a digital receipt. The top bar includes a menu icon, the text '* Digital Receipt', and navigation tabs for 'GETRÄNKE', 'RESTAURANT', 'DIVERSES', and 'SCHNELLSUCHE'. The main area displays a receipt for '*Kaffee' (x1, 2.50) and 'Hausgemachter Apfelkuchen' (+3.50), with a total amount of 6.00. A grid of beverage categories is visible, including 'Heiße Getränke', 'Kaffe', 'Koffeinfreier Kaffee', 'Espresso', 'Weine', 'Kaffe mit Schuss', 'Kalte Getränke', 'Coca-Cola', 'Coca-Cola Light', 'Coca Cola Zero', 'Orangina', 'Spirituosen', 'Whisky & Cognac', 'Bier', 'Duvel', 'Lefte Blond', 'Weizenbier', and 'Corona'. A keypad at the bottom left allows for input, and a payment method selection area at the bottom right shows 'ADYEN-CARD' and 'BARGELD' (highlighted with a red box).

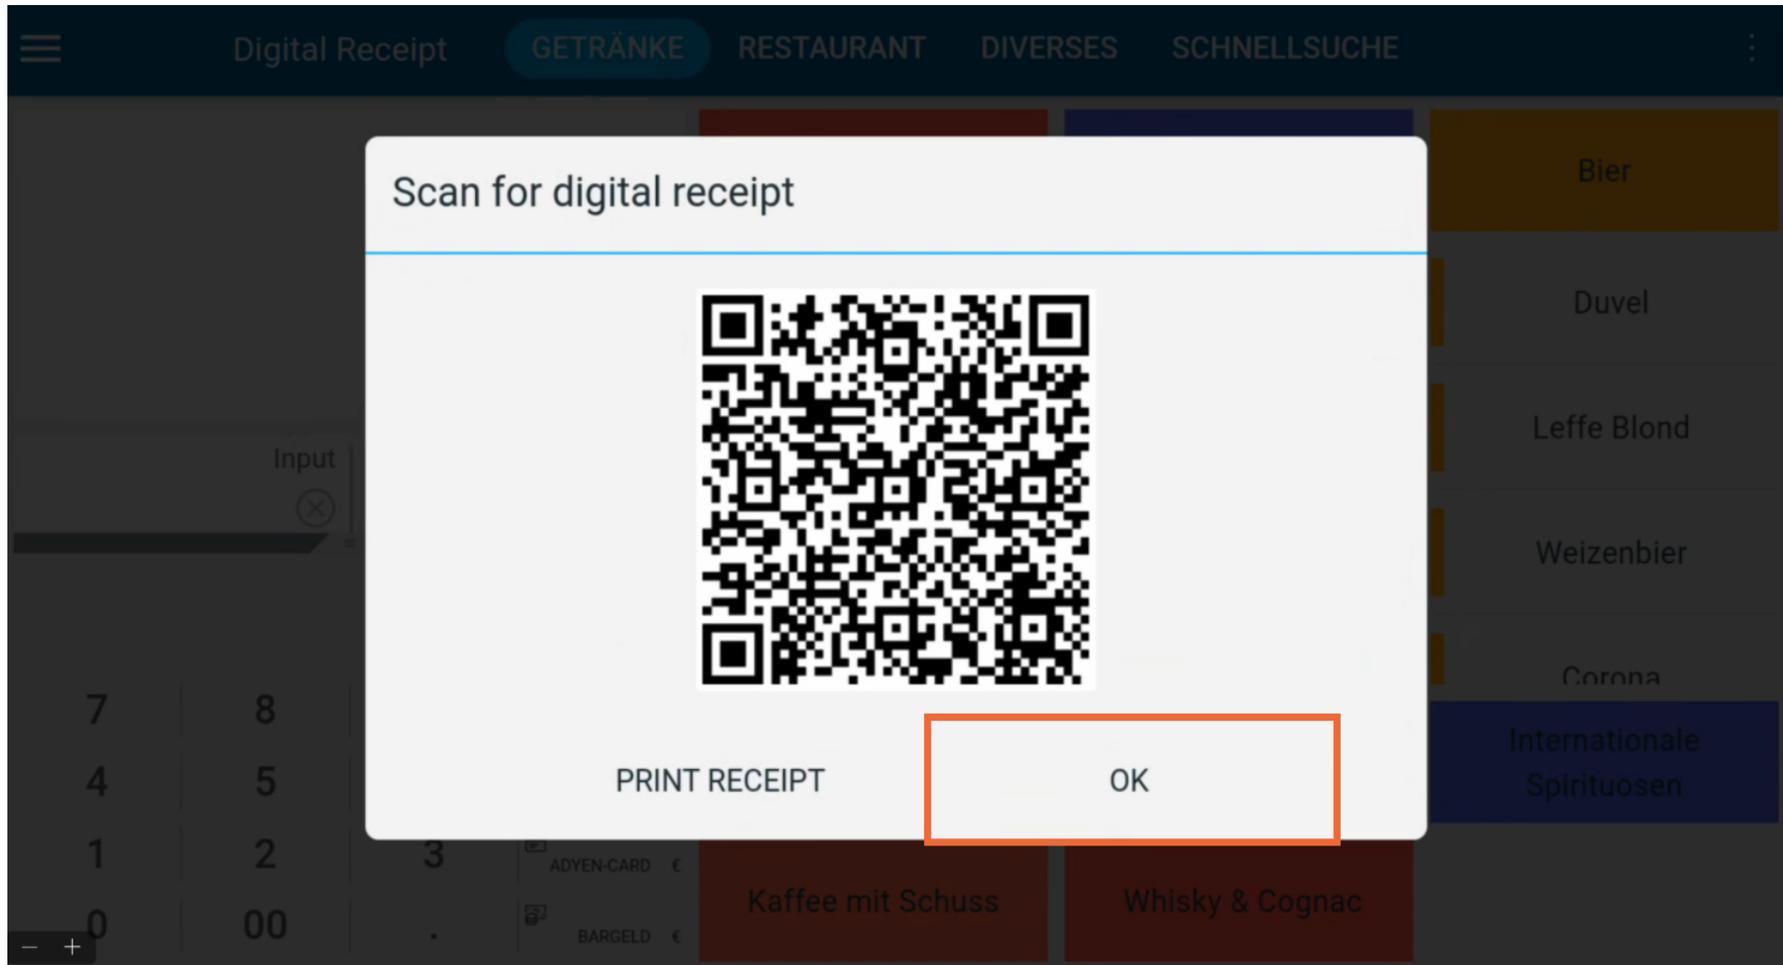

- 🕒 If you have set up the digital receipt in the back-office (click [here](#) for how to set up the digital receipt) a QR code will appear your customer can scan to receive his receipt digitally.

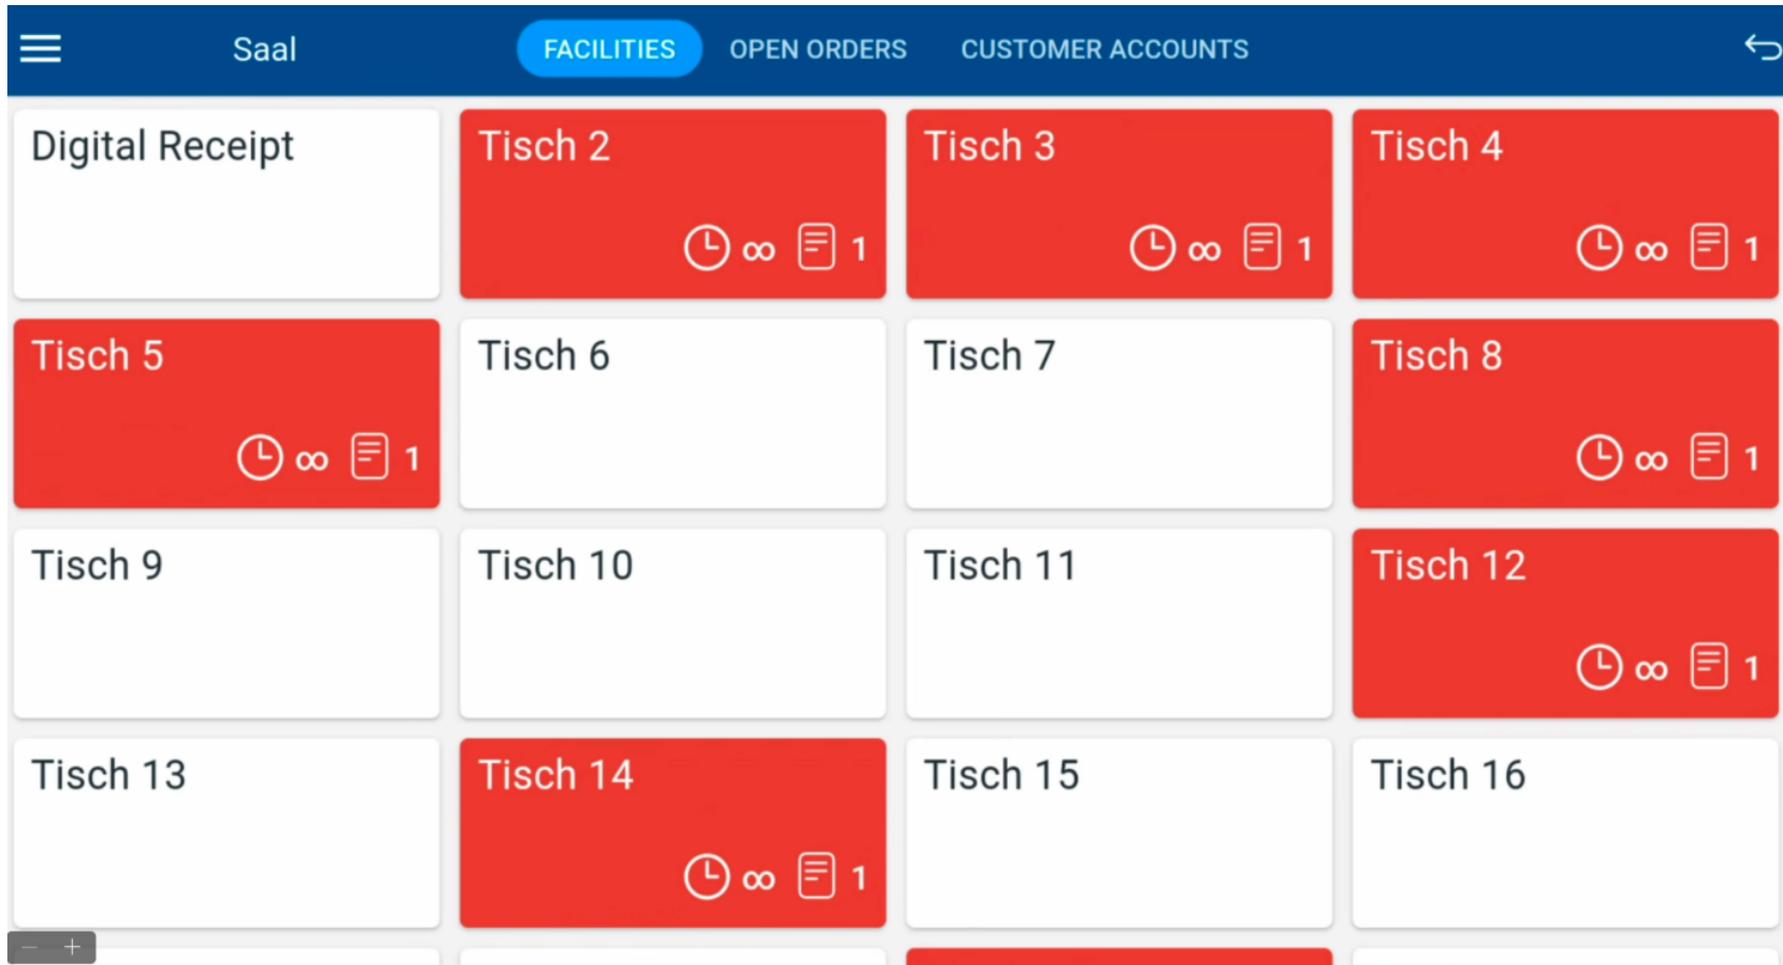

- In case you need a print-out tap **PRINT RECEIPT**.

- Once everything is set tap **OK** to close the table.

 That's it! You have finished the tutorial and now know how to send your customer a digital receipt.
