

WEL: SmartStart Help Guide

Introduction to WEL: SmartStart

To support educational settings that focus on play-based or whole-child practices before school, Waterford Reading Academy includes an alternate sequence called Waterford Early Learning: SmartStart where select online activities in reading, math, science, and social-emotional development are blended to fit within one 15-minute session per day.

Waterford.org recommends that students age 4 and above use this software alongside positive parent-family interactions and a strong interdisciplinary classroom instruction.

Waterford Early Learning: SmartStart uses many of the same features as Waterford Early Learning, our elementary school program, including:

- Waterford Manager
- Reports
- Dashboards
- Classroom Presentation Mode
- Student Portal

WEL: SmartStart vs. Waterford UPSTART

WEL: SmartStart is similar to Waterford UPSTART in that both teach PreK students essential school readiness skills. Waterford UPSTART uses an adaptive software sequencer to individualize instruction while WEL: SmartStart follows a linear approach, providing valuable exposure to all of its essential early learning content.

Waterford UPSTART is used at home and also provides qualifying families with computers and Internet access as needed. WEL: SmartStart is used in school settings and is paired with a core curriculum and easy-to-use Teacher's Guide.

Teacher Materials

The Teacher Materials section includes worksheets, printable activities, newsletters, and other resources for use in your class. To access Teacher Materials:

1. Log in to your Waterford Manager account.
2. Click on the **Curriculum** tab.
3. Click Search, then click on the **Teacher Materials** tab.

4. Search for a title resource by title or subject. If you would like to find a reading activity, for example, search for “reading.”

Note: All Teacher Materials complement lessons and activities from the WEL: SmartStart curriculum.

Home Access

Home Access allows children to use Waterford SmartStart at home on their computer. At this time, it is only available on computers or laptops, not tablets. To enable or disable **Home Access**:

1. +
Log in to Waterford Manager and visit the **Students** tab.
2. Select your class.
3. Click **Courses**.
4. Enter the number of at-home sessions you would like to allow per week for your class in the **Sessions at Home** box.
5. Click **Save** to confirm your changes.

*Note: **Home Access** must be allowed by an administrator before teachers can enable or disable it for their class. Contact your school or district administrator if you would like to use **Home Access** with your class.*
