<b>B. Understand and apply properties of operations and the relationship between addition and subtraction.</b>		
<p>3. Apply properties of operations to add. <i>For example, when adding numbers order does not matter. If <math>8 + 3 = 11</math> is known, then <math>3 + 8 = 11</math> is also known (Commutative property of addition). To add <math>2 + 6 + 4</math>, the second two numbers can be added to make a ten, so <math>2 + 6 + 4 = 2 + 10 = 12</math> (Associative property of addition).
