

USA SIM Unlimited Data Troubleshooting

Troubleshooting Guide

1. My data isn't working

If you've just activated your SIM

If you've just activated your SIM and you've got a signal, you might need to check a couple of things to get your data working.

- 1 Check that you have Data Roaming & Mobile Data turned on in your Settings.
- 2 Make sure that you have changed your APN settings to match the following:
Name: T-Mobile
APN: Fast.t-mobile.com (for LTE devices) or epc.tmobile.com (for non-LTE devices)
User name: Not set
Password: Not set
- 3 Restart your phone
- 4 If it's still not working, try the SIM in another phone to see if it'll work there.

If you've been using your SIM but suddenly your data has stopped working

- 1 Check that you have data balance left by dialling **#932#**
- 2 Try turning your device off and on
- 3 Try to remove the SIM from your device and re-insert it
- 4 [Check the coverage \(https://www.t-mobile.com/coverage/coverage-map\)](https://www.t-mobile.com/coverage/coverage-map) in the area you are in
- 5 If your phone says it's connected to LTE or 4G but the data isn't working, try to manually turn off LTE/4G to connect to 4G/3G.

Apple:

Settings > Mobile > Mobile data options > Disable LTE > Restart

Android:

Settings > Connections > Mobile Networks > Network Mode > Switch to 3G/2G > Restart

It might look different depending on your device! If these instructions don't match exactly, explore your settings until you find **Network Mode**

2. I'm having issues making calls or texts

This SIM comes with calls & SMS to US numbers only.
