- 4 Restart your device

Easy peasy! 🙌

## My data isn't working

If you've just activated your SIM

If you've just activated your SIM and you've got a signal, you might need to check a couple of things to get your data working.

- 1 Check that you have [Data Roaming](https://simsdirect.helpdocs.io/article/en4xz69tdn-turning-on-data-roaming) (<https://simsdirect.helpdocs.io/article/en4xz69tdn-turning-on-data-roaming>) & Mobile Data turned on in your Settings.
- 2 Make sure that you have changed your [APN settings](https://simsdirect.helpdocs.io/article/p53og0pk13-changing-your-apn-settings) (<https://simsdirect.helpdocs.io/article/p53og0pk13-changing-your-apn-settings>) to match the following:

**Name:** 3gnet

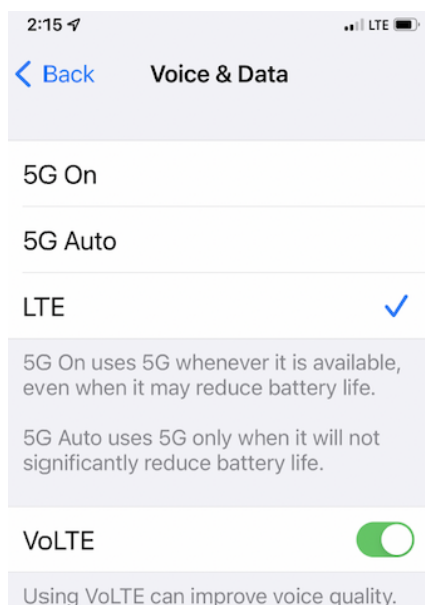

**APN:** 3gnet

**User name:** [leave this field blank]

**Password:** [leave this field blank]

- 3 Restart your phone
- 4 If it's still not working, try the SIM in another phone to see if it'll work there.

If that is still not working check your phone settings to see if there is an LTE option and select that.

**If you've been using your SIM but suddenly your data has stopped working**

- 1 Check that you have data balance left
- 2 Try turning your device off and on
- 3 Try to remove the SIM from your device and re-insert it
- 4 If your phone says it's connected to LTE or 4G but the data isn't working, try to manually turn off LTE/4G to connect to 4G/3G.

### **Apple:**

Settings > Mobile > Mobile data options > Disable LTE > Restart

### **Android:**

Settings > Connections > Mobile Networks > Network Mode > Switch to 3G/2G > Restart

It might look different depending on your device! If these instructions don't match exactly, explore your settings until you find **Network Mode**

## How do I find my mobile number?

This SIM is **data-only** so it doesn't come with a phone number! The SIM cannot make or receive calls and texts!

## How do I check my balance?

You can find how much data you've used in your [phone settings](https://simsdirect.helpdocs.io/article/dy2qi1918r-how-to-keep-track-of-your-data-usage-from-your-phone-settings) (<https://simsdirect.helpdocs.io/article/dy2qi1918r-how-to-keep-track-of-your-data-usage-from-your-phone-settings>)!

If you're using a wifi device, unfortunately, there's no way to check your usage.

## How do I recharge?

As described on the website, the SIM is non-rechargeable. The only way around this is to buy multiple SIM cards and swap them out as you go.

## How do I know if my device is unlocked?

If you bought your device outright, it's most likely unlocked!

If you're unsure, the best way to find out is to call your Aussie network provider and ask! They'll be able to unlock it for you too. This might incur a fee! 🙄
