

 Long click on the **table** to see the table functions. In our case we long click on **table 3**.

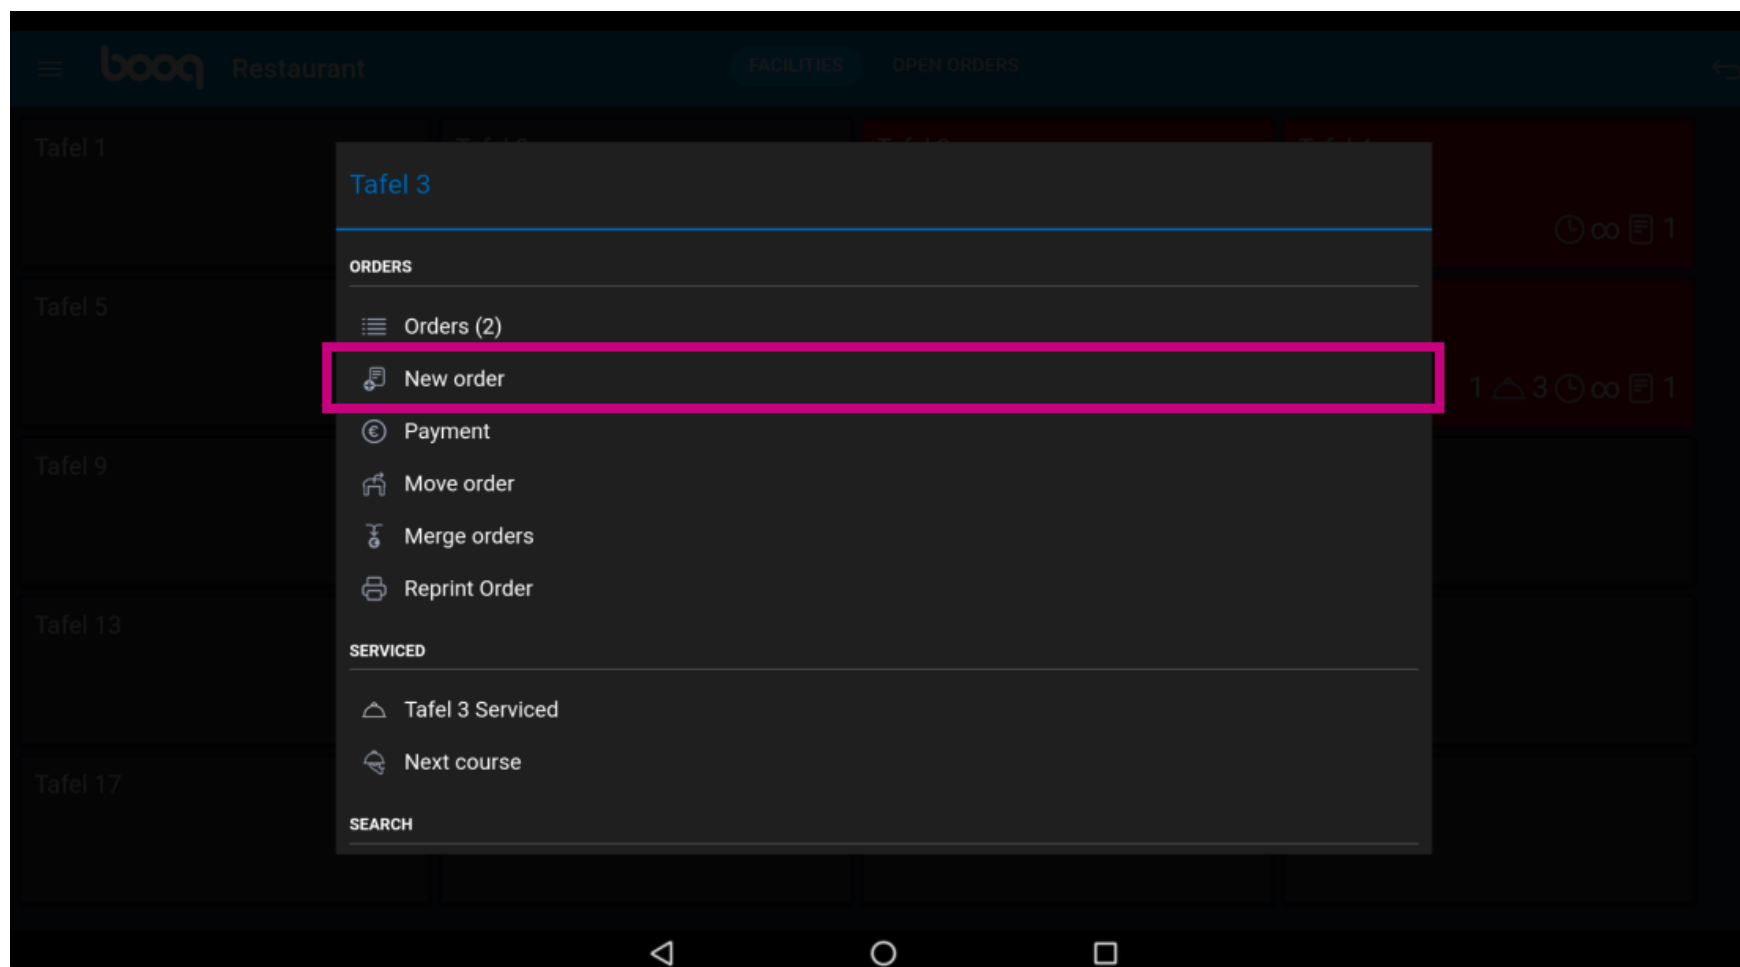

Click on **Orders (2)** to view the orders on this table.

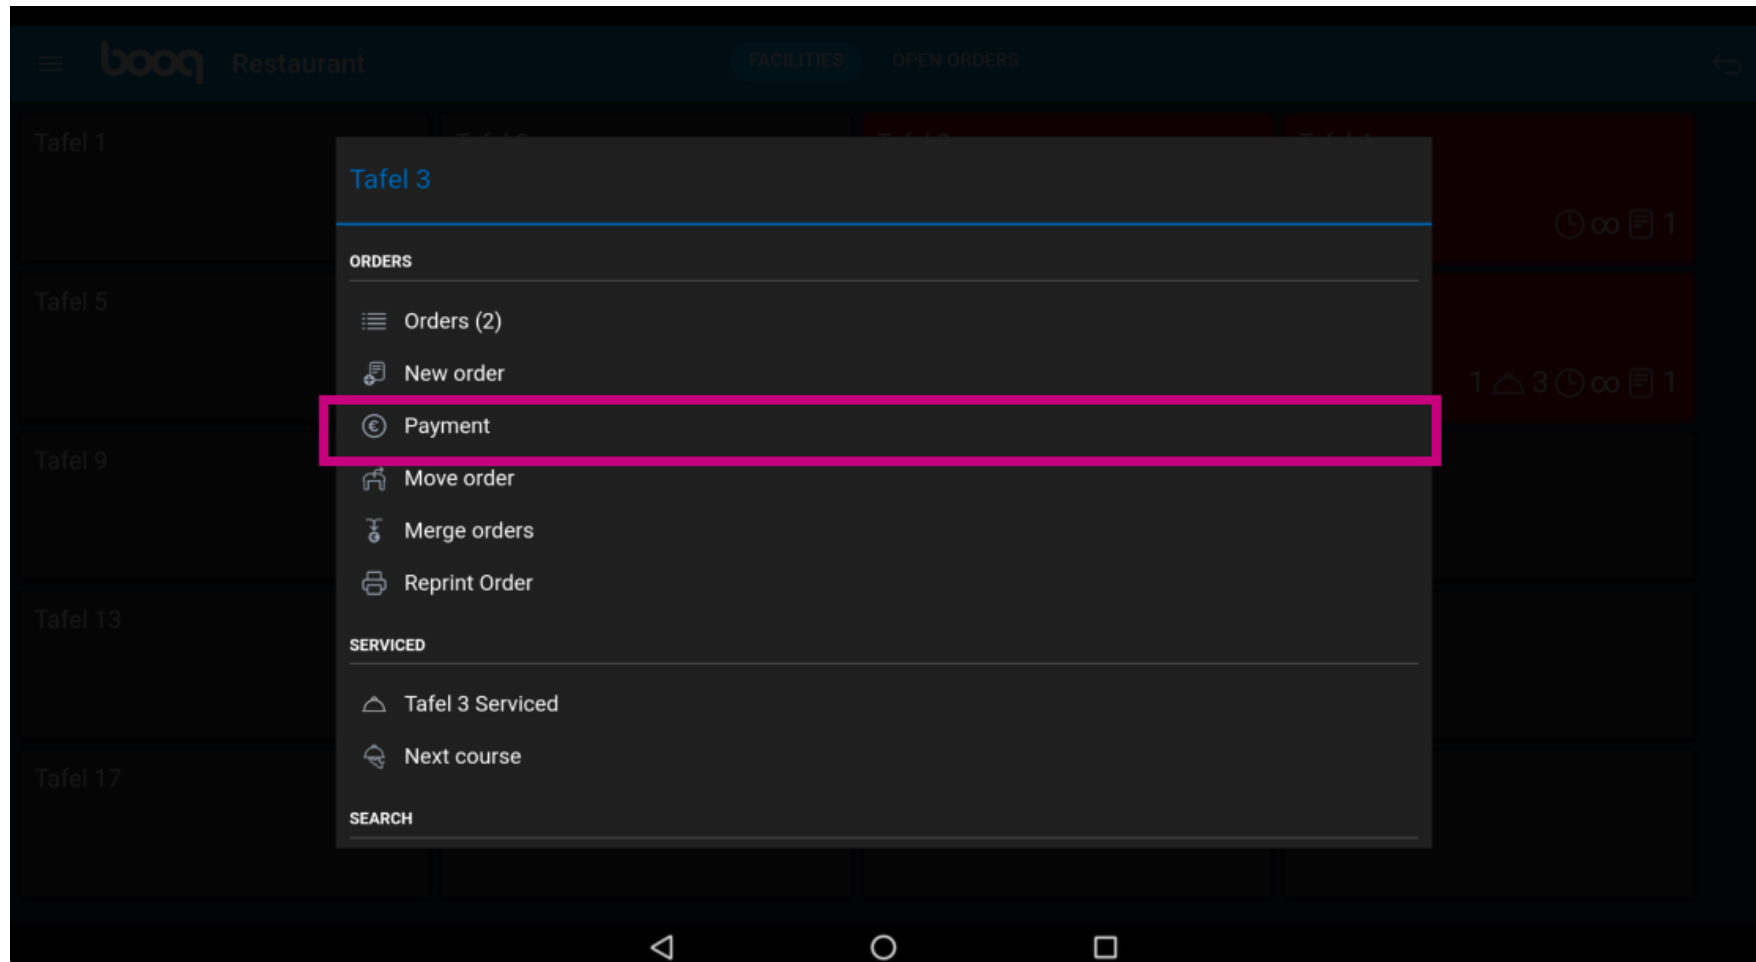

- 
 Click on **New order** to start a new order on the table. **Note: You can have several separate orders for the same table/facilities.**

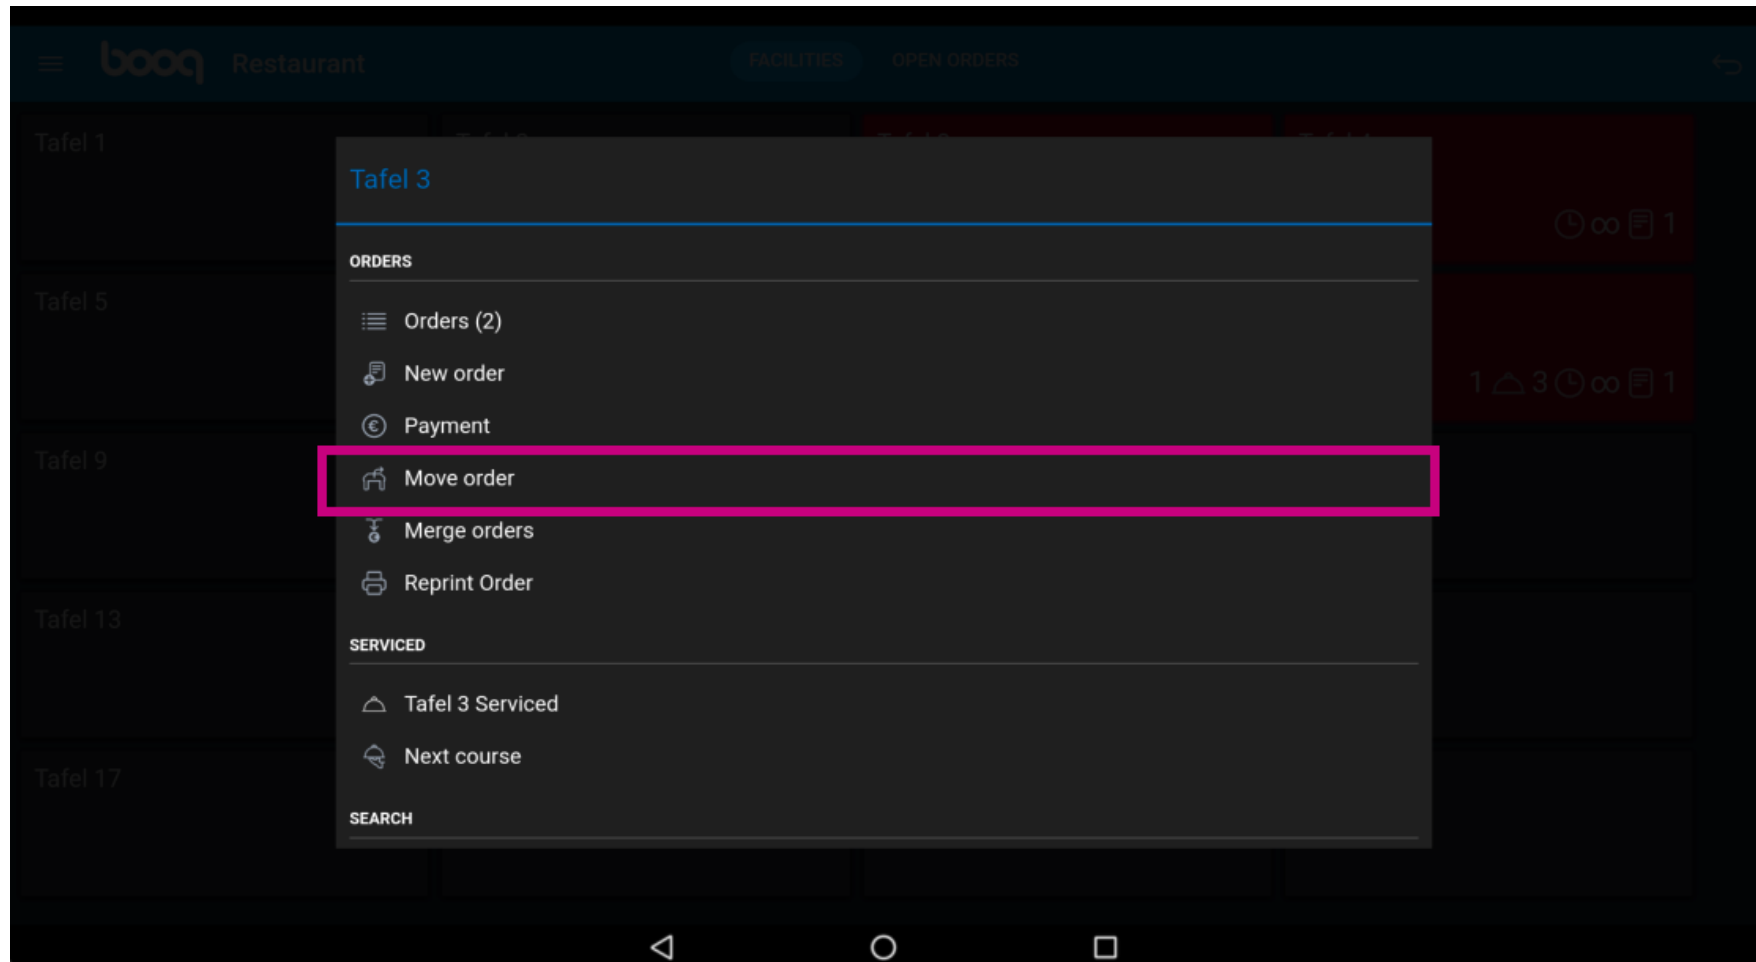

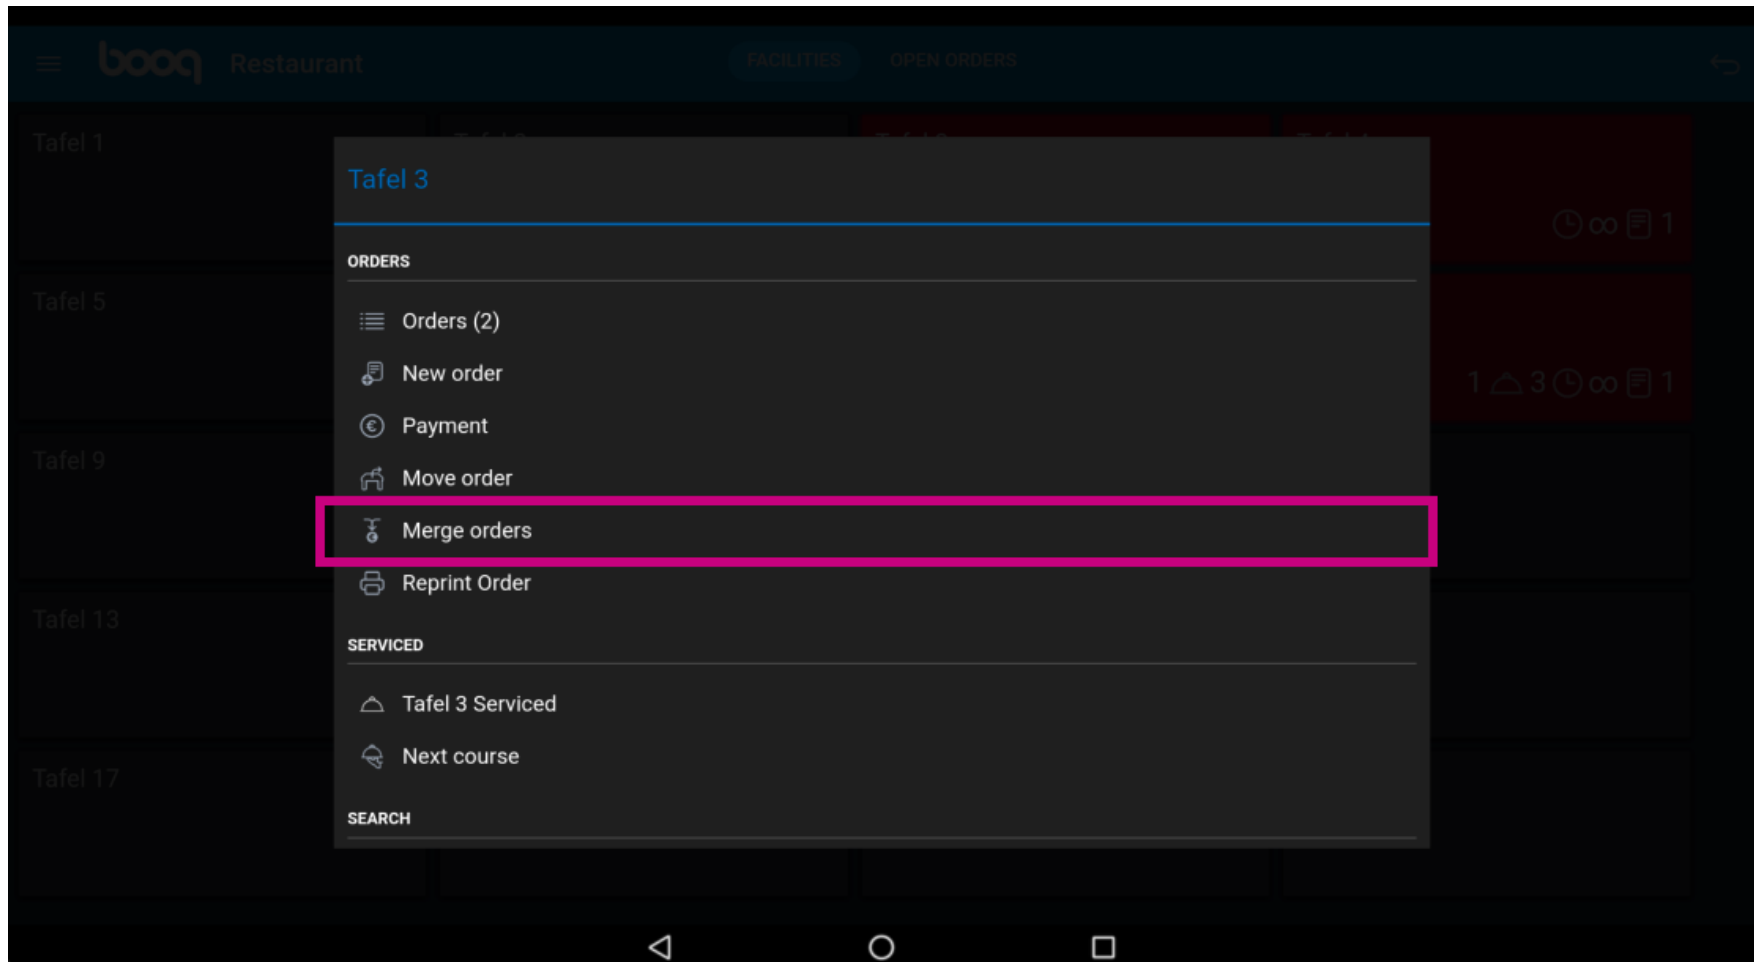

Click on **Payment** to pay for the order.

-  Click on **Move order** to move a order to another table or facility.

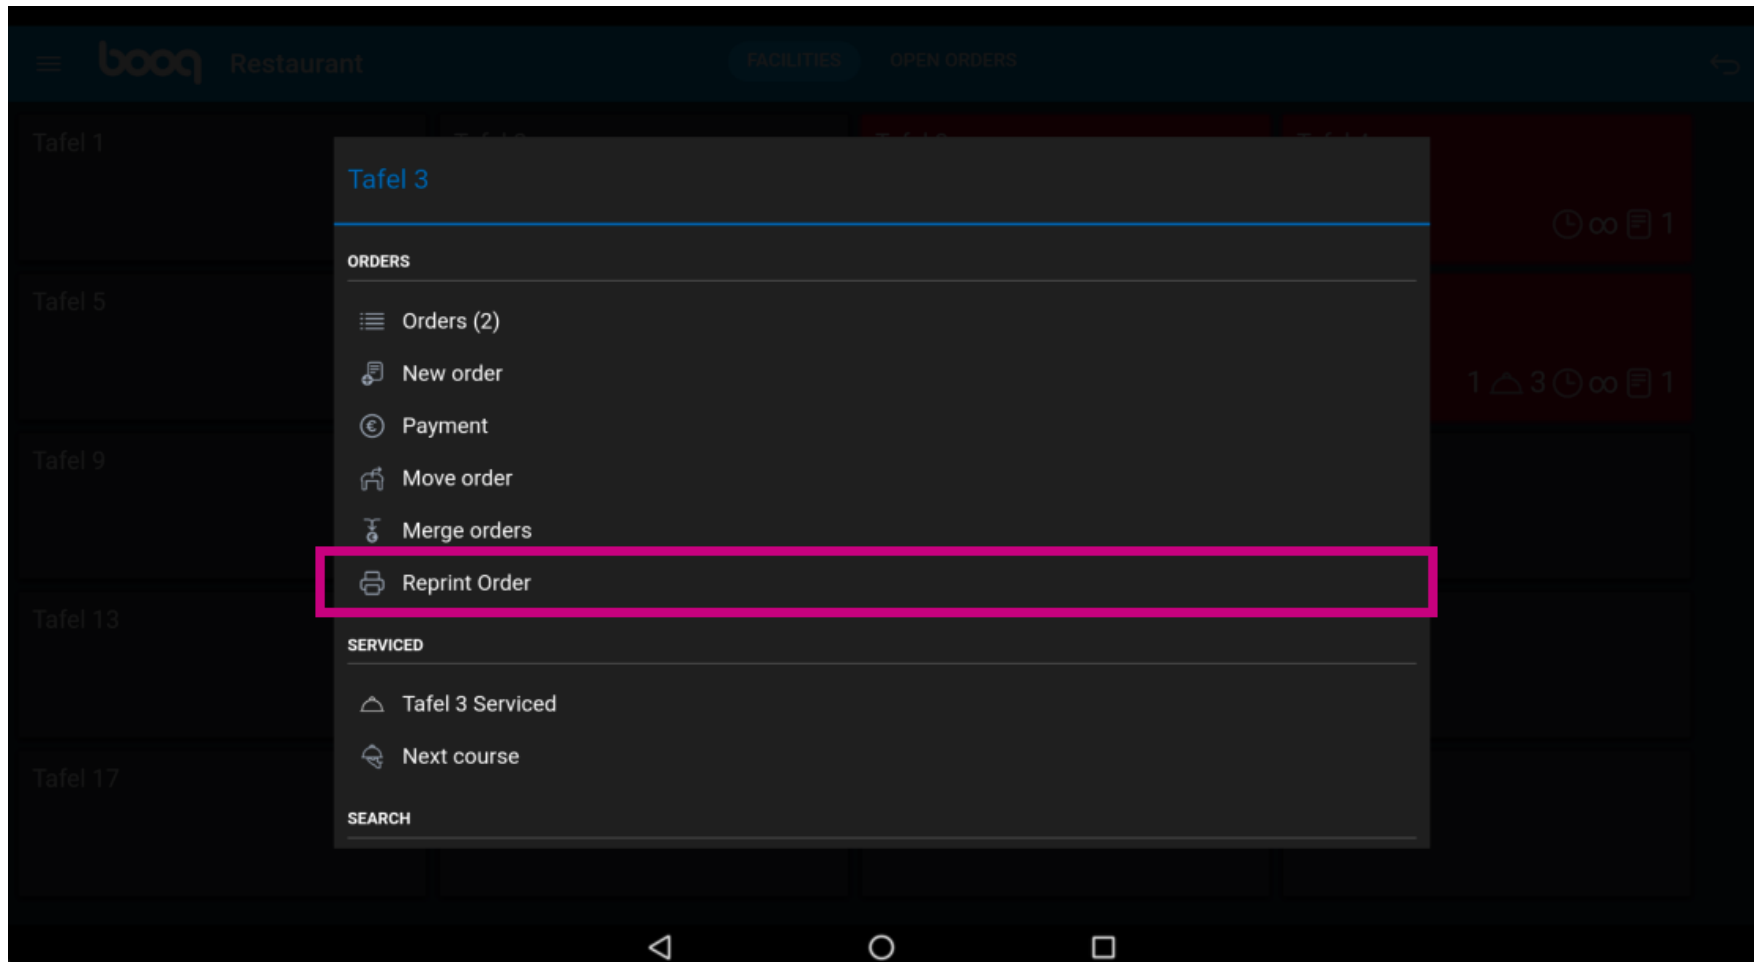

-  Click on **Merge orders** to merge order with multiple tables.

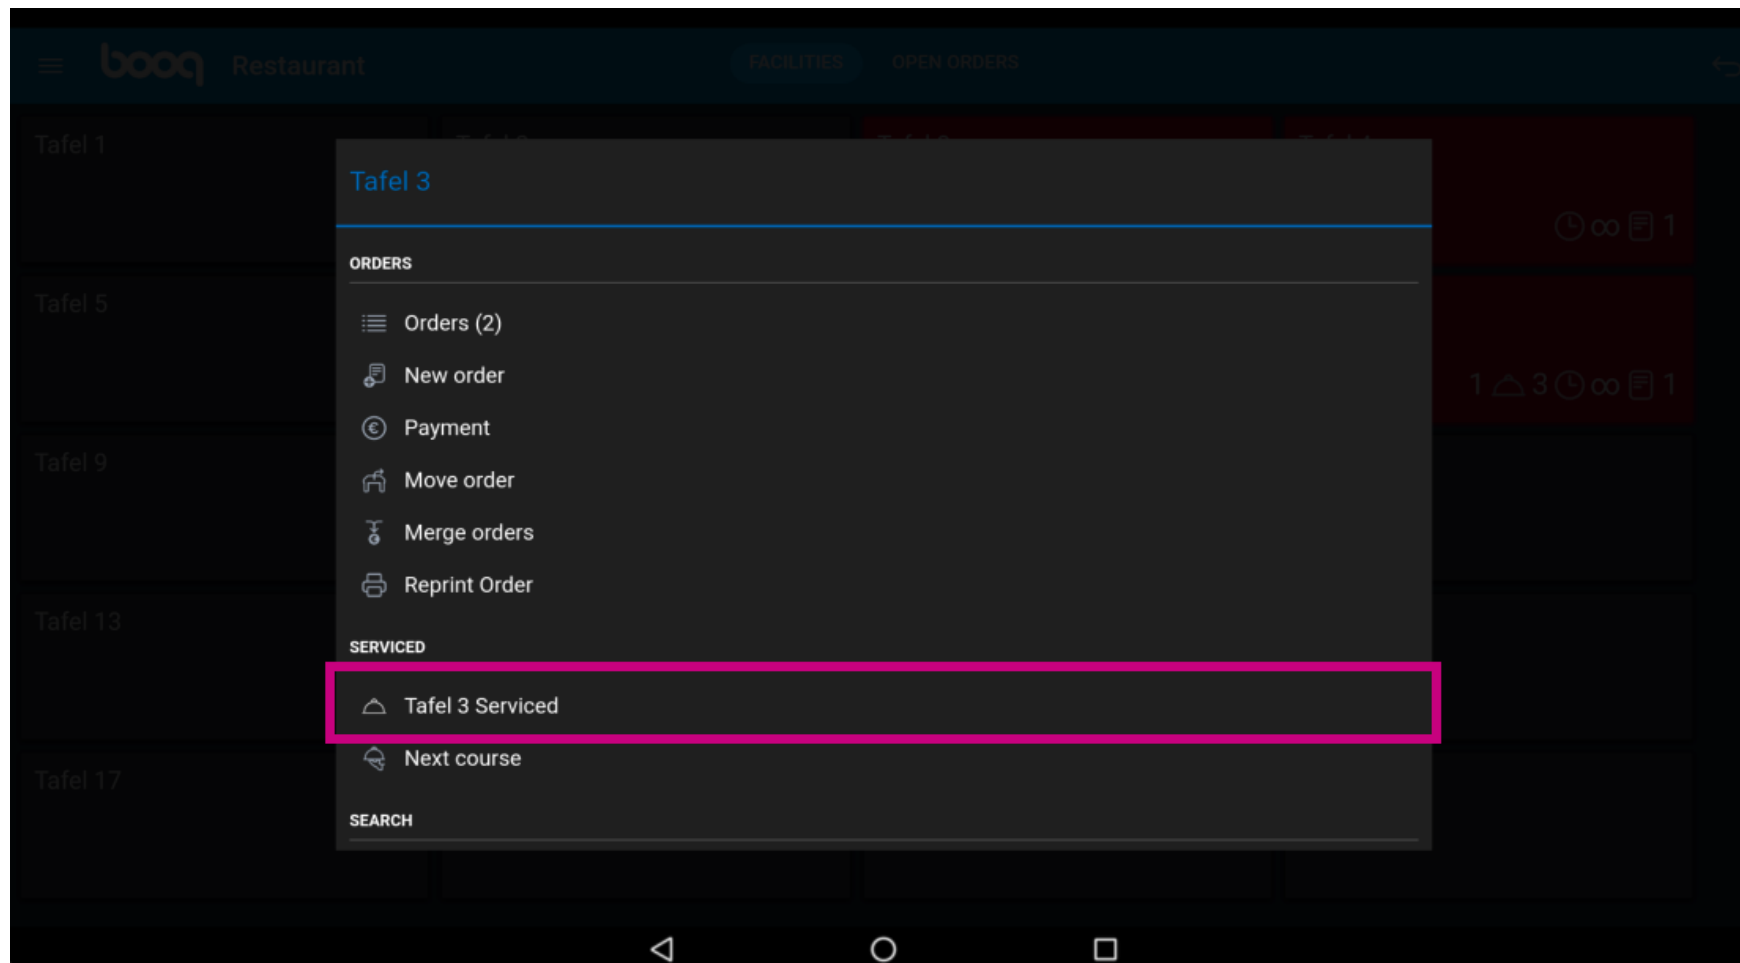

Click on **Reprint Order** to reprint an invoice what got payed on this table or facility.

 By clicking on the field **Tafel 3 Serviced** you can reset the timer. **Note: the timer will start again.**

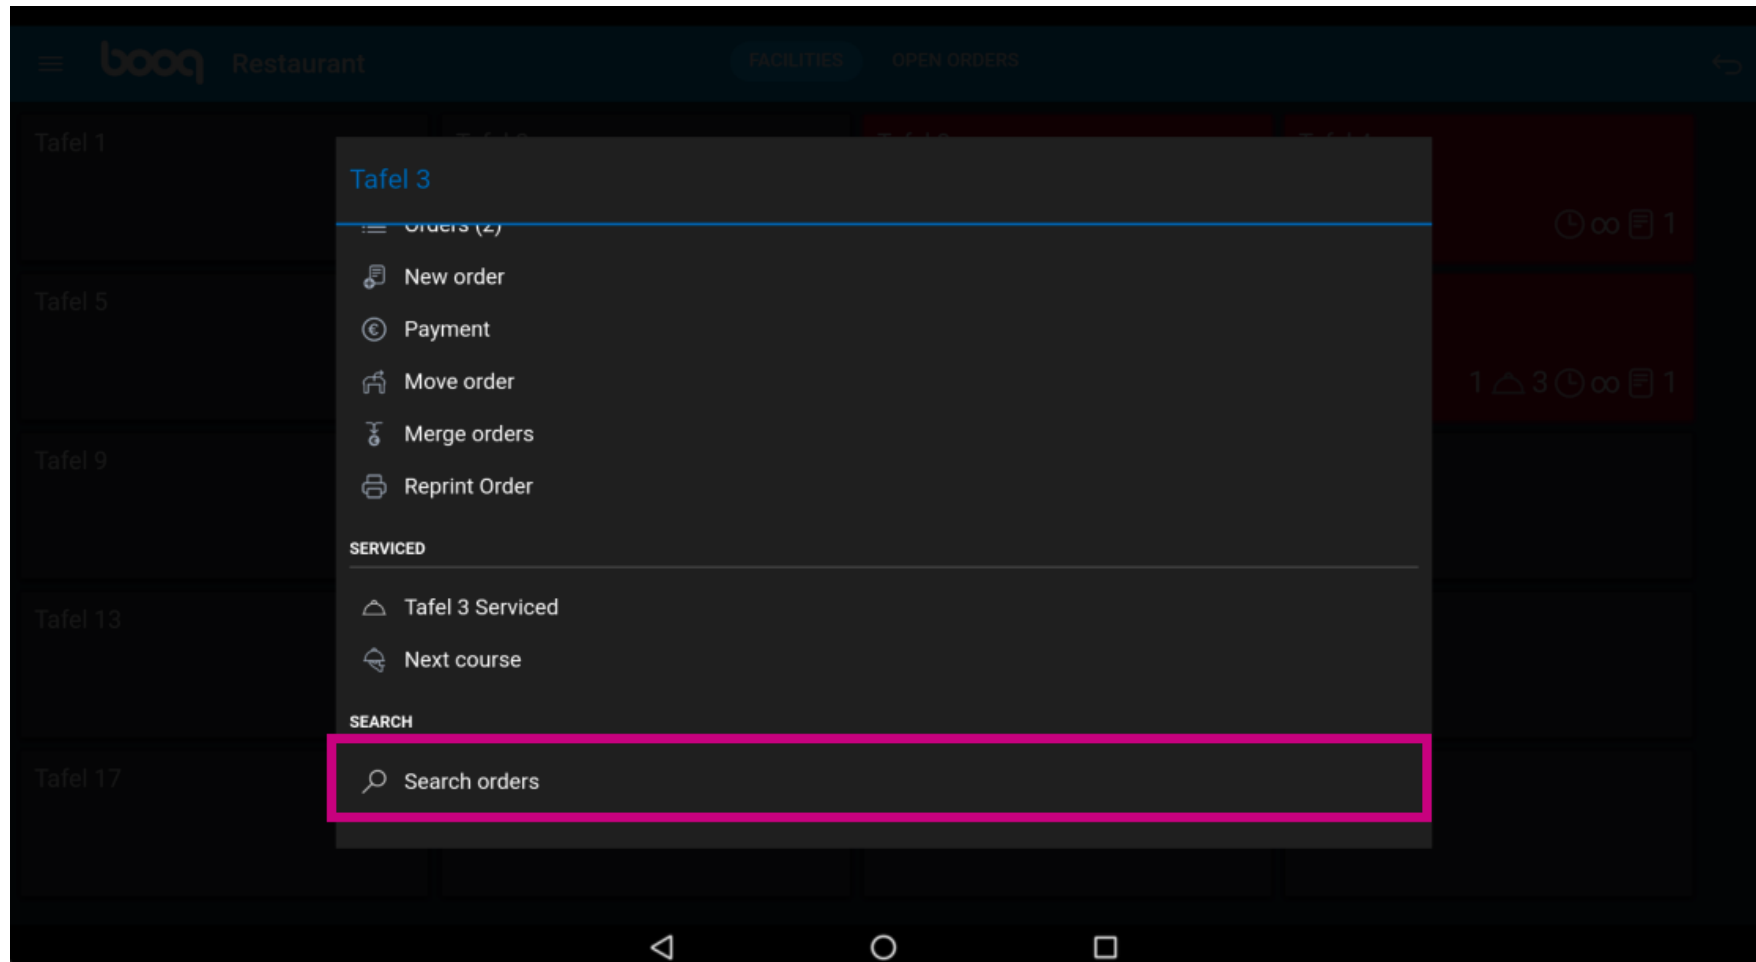

-  If multiple courses are added to the table, click on **Next course** to ask what course is next.

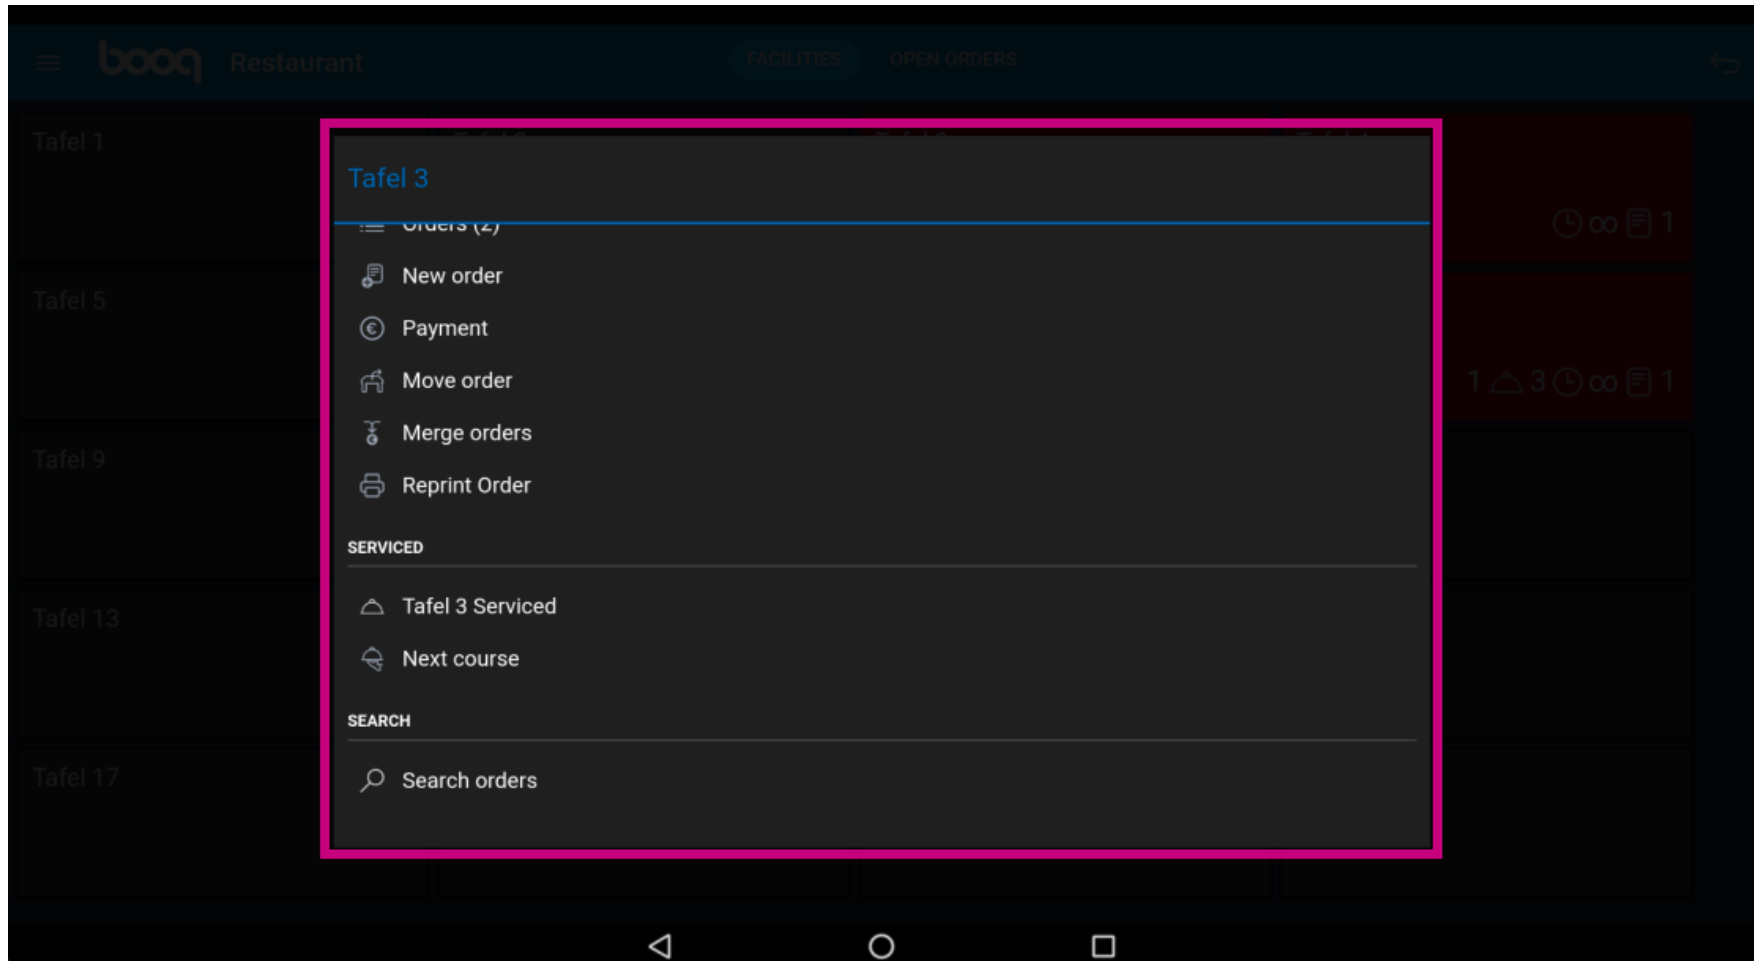

Scroll down and click on **Search orders** to use the search function to find an order on the table.

That's it. You're done.
