9. Done! Now it's time to set up the PriceTag. If you need help with this step, please contact [tech@viabill.com](mailto:tech@viabill.com) and we will send you a Shopify collaborator request.

**Keep in mind that the following instructions are general guidelines and might not apply to every store.**

Check this guide if you need more information

<https://viabill.io/api/pricetag/>

10. To set up your PriceTag, copy the PriceTag script from the app. It should look similar to this:

```
<script>
  (function() {
    var o=document.createElement('script');
    o.type='text/javascript';
    o.async=true;
    o.src='https://pricetag.viabill.com/script/{SHOPSPECIFIC}';
    var s=document.getElementsByTagName('script')[0];
    s.parentNode.insertBefore(o,s);
  })();
</script>
```

11. Paste the script at the end of the “cart.template” and “product.template” files.

12. To set up the PriceTag on your **product page**, look for “product-template.liquid”, and insert the following code close to “product.price” or something similar.

```
<div class="viabill-pricetag" data-view="product" data-price="{{ product.price | money }}" data-language="en" data-currency="usd"></div>
```

13. To set up the PriceTag on your **cart page**, look for “cart-template.liquid”, and insert the following code close to “cart.total” or something similar.

```
<div class="viabill-pricetag" data-view="basket" data-price="{{ cart.total_price | money }}" data-language="en" data-currency="usd"></div>
```
