LearnPlatform - Skyward OneRoster Connection

Introduction

This document explains how to configure a OneRoster® v1.1 export from Skyward® for use with LearnPlatform.

Instructions

1. In Skyward®, go to **Student Management > Administration > SkyBuild > Exports**
2. Select *OneRoster® Export*
3. Select **Add** to add a new template
4. Enter a Template Description (for example: "LearnPlatform OneRoster")
5. For Export Version, select OneRoster® v1.1
6. Under *Export Options*, configure these settings:
   a. **Include All Entities** = ON
   b. **Allow multiple 'Users.csv' records** = OFF
   c. **Include Guardians** = OFF
   d. **Send File via FTP** = ON
      i. You will need to configure a new SFTP location using information received from our Services and Support team. (support@learnplatform.com)
   e. **Save File via UNC Path** = OFF
7. Under *Version Specific Options – v1.1*, configure these settings:
   a. **Use GUIDS** = OFF
   b. **Academic Sessions** = Bulk
   c. **Categories** = Do Not Export
   d. **Classes** = Do Not Export
   e. **Courses** = Do Not Export
   f. **Demographics** = Do Not Export
   g. **Enrollments** = Do Not Export
   h. **Line Items** = Do Not Export
   i. **Orgs** = Bulk
   j. **Results** = Do Not Export
   k. **Users** = Bulk
8. Click the *Save* button in the upper-right to save your export
