

Dear Parent/Guardian,

I am happy to share that your child has access at home to a personalized math program called Mangahigh. We use the program at school to practice math and personalize learning for students. The program has games and short question sets that automatically change difficulty levels based on the answers your child submits.

Mangahigh works on any device with an internet connection and is available for your child to use at home 24 hours a day, 7 days a week.

In addition to assignments set by the teacher, Mangahigh creates a list of recommended activities to help your child practice math topics that will boost their success in current and future grades. Your child can also explore math activities at different grade levels to further personalize and take control of their learning.

Your child's login information is found below. Please contact me or support@mangahigh.com if you have any questions about how to use Mangahigh.
